

LAMP 209UYSYGW/S530-A3/R2

Features

- Two chips are matched for uniform light output, wide viewing angle
- Long life-solid state reliability
- I.C. compatible/Low power consumption
- The product itself will remain within RoHS compliant version
- Compliance with EU REACH
- Compliance Halogen Free .(Br <900 ppm ,Cl <900 ppm , Br+Cl < 1500 ppm)

Description

- The 209LED lamp contain two integral chips and is available as both bicolor and bipolar types.
- Super Yellow and Super Yellow Green light is emitted by diodes of AlGaInP and AlGaInP
- Type of bipolar lamps are both White Clear and Color Clear while the bicolor are White Diffused

Applications

- TV set
- Monitor
- Telephone
- Computer

Device Selection Guide

Chip Materials	Emitted Color	Resin Color
AlGaInP	Super Yellow	White Diffused
AlGaInP	Super Yellow Green	

Absolute Maximum Ratings (Ta=25°C)

Parameter	Symbol	Rating		Unit
		UY/S530	SYG/S530	
Continuous Forward Current	I_F	25	25	mA
Reverse Voltage	V_R	5		V
Peak Forward Current (Duty 1/10 @ 1KHZ)	I_{FP}	160	160	mA
Electrostatic Discharge	ESD	2000	2000	V
		UY/S530	SYG/S530	
Power Dissipation	P_d	60	60	mW
		UY/S530	SYG/S530	
Operating Temperature	T_{opr}	-40 ~ +85		°C
Storage Temperature	T_{stg}	-40 ~ +100		°C
Soldering Temperature	T_{sol}	260 °C for 5 sec.		

Electro-Optical Characteristics (Ta=25°C)

Parameter	Symbol		Min.	Typ.	Max.	Unit	Condition
	UY/S530	SYG/S530					
Forward Voltage	V_F	2.0	2.4	V	$I_F=20mA$		
		UY/S530	SYG/S530				
Reverse Current	I_R	10	10	μA	$V_R=5V$		
		UY/S530	SYG/S530				
Luminous Intensity	I_v	5.0	5.0	mcd	$I_F=20mA$		
		UY/S530	SYG/S530				
Viewing Angle	2 θ 1/2	50	50	deg	$I_F=20mA$		
		UY/S530	SYG/S530				
Peak Wavelength	λ_p	591	575	nm	$I_F=20mA$		
		UY/S530	SYG/S530				
Dominant Wavelength	λ_d	589	573	nm	$I_F=20mA$		
		UY/S530	SYG/S530				
Spectrum Radiation Bandwidth	$\Delta \lambda$	15	20	nm	$I_F=20mA$		
		UY/S530	SYG/S530				

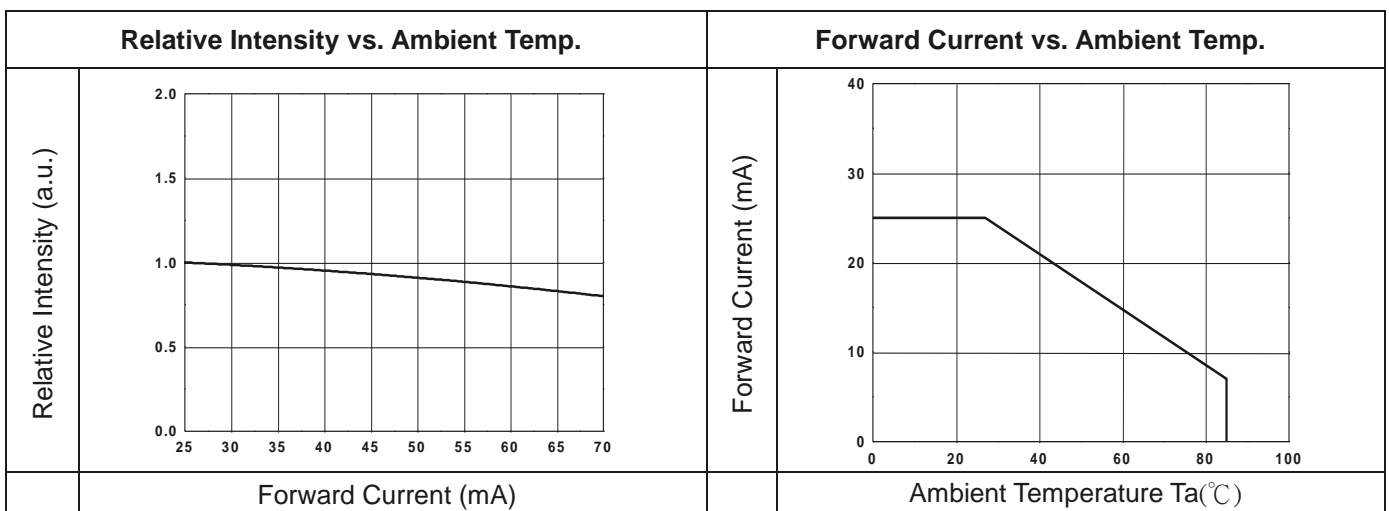

Note:

*Measurement Uncertainty of Forward Voltage: $\pm 0.1V$

*Measurement Uncertainty of Luminous Intensity: $\pm 10\%$

*Measurement Uncertainty of Dominant Wavelength $\pm 1.0nm$

Typical Electro-Optical Characteristics Curves
UY

SYG

Package Dimension

Note: Note:

1. All dimensions are in millimeters
2. The height of flange must be less than 1.5mm(0.059").
3. Without special declared, the tolerance is ± 0.25 mm.

Moisture Resistant Packing Materials

Label Explanation

- CPN: Customer's Production Number
- P/N : Production Number
- QTY: Packing Quantity
- CAT: Ranks of Luminous Intensity
- HUE: Ranks of Dominant Wavelength
- REF: Ranks of Forward Voltage
- LOT No: Lot Number

Packing Specification

■ Anti-electrostatic bag

■ Inner Carton

■ Outside Carton

■ Packing Quantity

1. Min 200 To 500 PCS/1 Bag, 5 Bags/1 Inner Carton
2. 10 Inner Cartons/1 Outside Carton

Notes

1. Lead Forming
 - During lead formation, the leads should be bent at a point at least 3mm from the base of the epoxy bulb.
 - Lead forming should be done before soldering.
 - Avoid stressing the LED package during leads forming. The stress to the base may damage the LED's characteristics or it may break the LEDs.
 - Cut the LED leadframes at room temperature. Cutting the leadframes at high temperatures may cause failure of the LEDs.
 - When mounting the LEDs onto a PCB, the PCB holes must be aligned exactly with the lead position of the LED. If the LEDs are mounted with stress at the leads, it causes deterioration of the epoxy resin and this will degrade the LEDs.
2. Storage
 - The LEDs should be stored at 30°C or less and 70%RH or less after being shipped from Everlight and the storage life limits are 3 months. If the LEDs are stored for 3 months or more, they can be stored for a year in a sealed container with a nitrogen atmosphere and moisture absorbent material.
 - Please avoid rapid transitions in ambient temperature, especially, in high humidity environments where condensation can occur.
3. Soldering
 - Careful attention should be paid during soldering. When soldering, leave more than 3mm from solder joint to epoxy bulb, and soldering beyond the base of the tie bar is recommended.

Recommended soldering conditions:

Hand Soldering		DIP Soldering	
Temp. at tip of iron	300°C Max. (30W Max.)	Preheat temp.	100°C Max. (60 sec Max.)
Soldering time	3 sec Max.	Bath temp. & time	260 Max., 5 sec Max
Distance	3mm Min.(From solder joint to epoxy bulb)	Distance	3mm Min. (From solder joint to epoxy bulb)

- Recommended soldering profile

- Avoiding applying any stress to the lead frame while the LEDs are at high temperature particularly when soldering.
- Dip and hand soldering should not be done more than one time
- After soldering the LEDs, the epoxy bulb should be protected from mechanical shock or vibration until the LEDs return to room temperature.
- A rapid-rate process is not recommended for cooling the LEDs down from the peak temperature.
- Although the recommended soldering conditions are specified in the above table, dip or hand soldering at the lowest possible temperature is desirable for the LEDs.

- Wave soldering parameter must be set and maintain according to recommended temperature and dwell time in the solder wave.
4. Cleaning
- When necessary, cleaning should occur only with isopropyl alcohol at room temperature for a duration of no more than one minute. Dry at room temperature before use.
 - Do not clean the LEDs by the ultrasonic. When it is absolutely necessary, the influence of ultrasonic cleaning on the LEDs depends on factors such as ultrasonic power and the assembled condition. Ultrasonic cleaning shall be pre-qualified to ensure this will not cause damage to the LED
5. Heat Management
- Heat management of LEDs must be taken into consideration during the design stage of LED application. The current should be de-rated appropriately by referring to the de-rating curve found in each product specification.
 - The temperature surrounding the LED in the application should be controlled. Please refer to the data sheet de-rating curve.
6. ESD (Electrostatic Discharge)
- The products are sensitive to static electricity or surge voltage. ESD can damage a die and its reliability.
When handling the products, the following measures against electrostatic discharge are strongly recommended:
 - Eliminating the charge
 - Grounded wrist strap, ESD footwear, clothes, and floors
 - Grounded workstation equipment and tools
 - ESD table/shelf mat made of conductive materials
 - Proper grounding is required for all devices, equipment, and machinery used in product assembly. Surge protection should be considered when designing of commercial products.
 - If tools or equipment contain insulating materials such as glass or plastic, the following measures against electrostatic discharge are strongly recommended:
 - Dissipating static charge with conductive materials
 - Preventing charge generation with moisture
 - Neutralizing the charge with ionizers
7. Directions for use
- The LEDs should be operated with forward bias. The driving circuit must be designed so that the LEDs are not subjected to forward or reverse voltage while it is off. If reverse voltage is continuously applied to the LEDs, it may cause migration resulting in LED damage.

DISCLAIMER

1. EVERLIGHT reserves the right(s) on the adjustment of product material mix for the specification.
2. The product meets EVERLIGHT published specification for a period of twelve (12) months from date of shipment.
3. The graphs shown in this datasheet are representing typical data only and do not show guaranteed values.
4. When using this product, please observe the absolute maximum ratings and the instructions for using outlined in these specification sheets. EVERLIGHT assumes no responsibility for any damage resulting from the use of the product which does not comply with the absolute maximum ratings and the instructions included in these specification sheets.
5. These specification sheets include materials protected under copyright of EVERLIGHT. Reproduction in any form is prohibited without obtaining EVERLIGHT's prior consent.
6. This product is not intended to be used for military, aircraft, automotive, medical, life sustaining or life saving applications or any other application which can result in human injury or death. Please contact authorized Everlight sales agent for special application request.
