

# **Multilayer Ceramic Chip Capacitor**

Part Number: 1210J6300682JKTAG1

1210 630V 6.8nF ±5% C0G/NP0 (1B) to **Description:** 

AEC-Q200

A range of C0G MLC capacitors fully tested and approved to automotive specification AEC-Q200. Available in 0603 to 3640 chip sizes with capacitance values up to 5.6uF as standard. A variety of termination options are available, including FlexiCap™, the world's first commercially available flexible termination.

## **Board Layout**

Knowles' conventional 2-terminal chip capacitors can generally be mounted using pad designs in accordance with international specification IPC-7351, Generic Requirements for Surface Mount Design and Land Pattern Standards, but there are some other factors that have been shown to reduce mechanical stress, such as reducing the pad width to less than the chip width. In addition, the position of the chip on the board should be considered.

Some high voltage parts may require modifications to the board layout and/or the addition of a conformal coating to prevent flashover. Refer to application note AN0043 for further information.

# **Packaging**

Tape packaging information for tape-and-reel parts:

Tape and reel packing of surface mounting chip capacitors for automatic placement are in accordance with IEC60286-3.

### Soldering

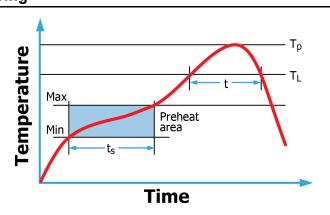

Reflow solder in accordance with IPC-A-610. Recommended reflow profile as laid down in IPC/JEDEC J-STD-020.

Wave soldering is also possible, but care must be taken for case sizes 1210 and larger and component thickness >1.0mm. Trials are encouraged.

Hand soldering is not recommended and can lead to component damage through thermal shock.

PdAg terminations are primarily intended for conductive epoxy attachment - they may be suitable for soldering but trials are recommended.
