OB6561PX
High Performance PFC Controller

GENERAL DESCRIPTION

OB6561PX is an active transition-mode (TM) power factor correction (PFC) controller for AC-DC switching mode power supply applications.

OB6561PX features a one quadrant multiplier with THD optimizer for near unity power factor, zero current detector (ZCD) to ensure TM operation, a current sensing comparator with built-in leading-edge blanking, and a totem pole output ideally suited for driving a power MOSFET.

OB6561PX offers great protection coverage including system over-voltage protection (OVP) to eliminate runaway output voltage due to load removal, VCC under voltage lockout (UVLO), cycle-by-cycle current limiting, multiplier output clamping that limit maximum peak switch current, and gate drive output clamping for external power MOSFET protection.

With added system open loop protection feature, OB6561PX shuts down system when the feedback loop is open.

FEATURES

- Transition Mode (TM) Operation
- One quadrant multiplier with THD optimizer
- Low Start-up Current and Operating Current
- Cycle-by-Cycle Current Limiting
- Internal RC Filter
- Under Voltage Lockout with Hysteresis
- Very Precise Adjustable Output Overvoltage Protection
- Disable Function
- Totem Pole Output with High State Clamping
- System Open Loop Protection
- Audio Noise Free
- 9.5V to 28V wide range of VCC voltage

## APPLICATIONS

- Electronic Ballast
- AC-DC SMPS

TYPICAL APPLICATION
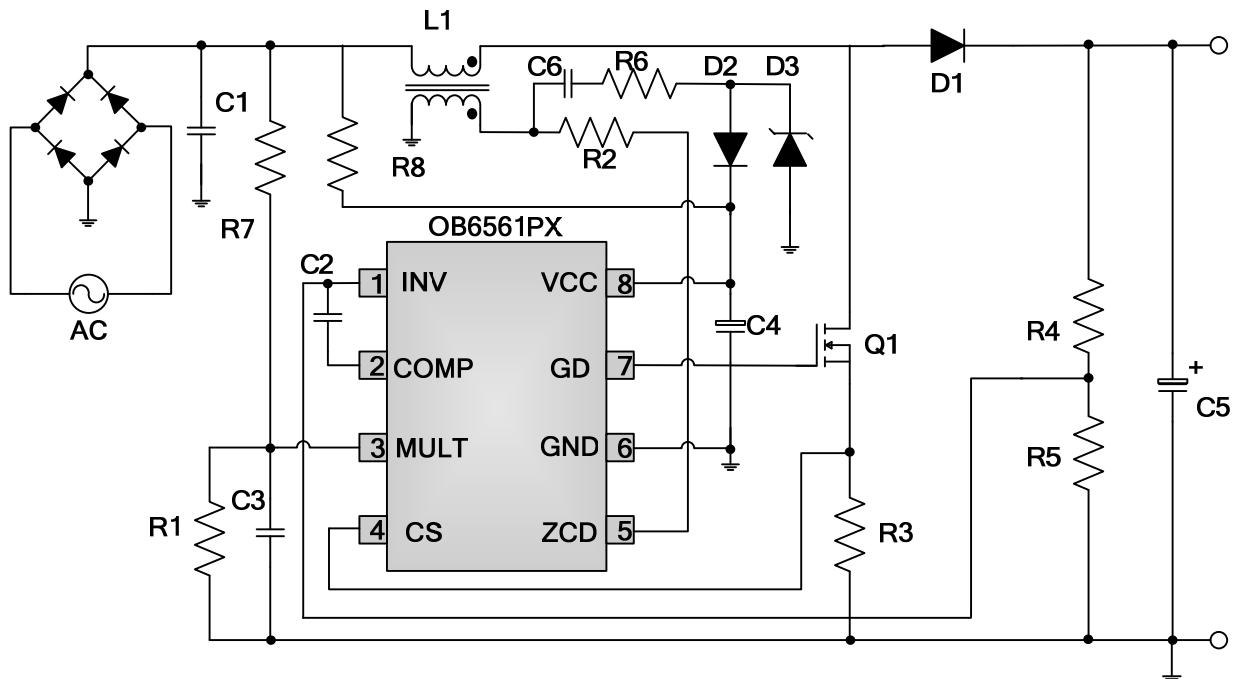

GENERAL INFORMATION

Terminal Assignment
In SOP8 or DIP8 Package.

```
         ┌─────────┐
INV   ┤ 1    ○    8 ├ VCC
COMP  ┤ 2         7 ├ GD
MULT  ┤ 3         6 ├ GND
CS    ┤ 4         5 ├ ZCD
         └─────────┘
```

Ordering Information

Part Number	Description
OB6561PXAP	8 Pin DIP, Pb free in Tube
OB6561PXCP	8 Pin SOP, Pb free in Tube
OB6561PXCPA	8 Pin SOP, Pb free in T&R

Package Dissipation Rating

Package	RθJA (℃/W)
DIP8	90
SOP8	150

Absolute Maximum Ratings

Symbol	Parameter	Value
VCC	DC Supply voltage	30 V
I_ZCD	Zero Current Detector Max. Current	50mA(source) -10mA(sink)
CS INV COMP MULT	Analog inputs & outputs	-0.3 to 7V
Tj	Min/Max Operating Junction Temperature	-40 to 150 ℃
Tstg	Min/Max Storage Temperature	-55 to 150 ℃
Lead Temperature	(Soldering, 10secs)	260℃

Note: Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute maximum-rated conditions for extended periods may affect device reliability.

TERMINAL DESCRIPTIONS

Pin Num	Pin Name	I/O	Description
1	INV	I	Inverting Input of Error Amplifier. Connected to Resistor Divider from System Output. This pin is also used for system open loop protection.
2	COMP	O	Output of Error Amplifier. A feedback compensation network is placed between COMP and the INV pin.
3	MULT	I	Input of Multiplier. Connected to Line Voltage after Bridge Diodes via A Resistor Divider to Provide Sinusoidal Reference Voltage to the Current Loop.
4	CS	I	Current Sense Input Pin. Connected to MOSFET Current Sensing Node.
5	ZCD	I	Zero Current Detection Input. When Activated, A New Switching Cycle Starts. If it is connected to GND, the device is disabled.
6	GND	P	Ground Pin
7	GD	O	Gate driver output. Drive Power MOSFET.
8	VCC	P	DC Supply Voltage.

IMPORTANT NOTICE

RIGHT TO MAKE CHANGES
On-Bright Electronics Corp. reserves the right to make corrections, modifications, enhancements, improvements and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete.

WARRANTY INFORMATION
On-Bright Electronics Corp. warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with its standard warranty. Testing and other quality control techniques are used to the extent it deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.
On-Bright Electronics Corp. assumes no liability for application assistance or customer product design. Customers are responsible for their products and applications using On-Bright's components, data sheet and application notes. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

LIFE SUPPORT
On-Bright Electronics Corp.'s products are not designed to be used as components in devices intended to support or sustain human life. On-bright Electronics Corp. will not be held liable for any damages or claims resulting from the use of its products in medical applications.

MILITARY
On-Bright Electronics Corp.'s products are not designed for use in military applications. On-Bright Electronics Corp. will not be held liable for any damages or claims resulting from the use of its products in military applications.
