## 5. SOLDERING CONDITIONS:

- Condition for Soldering TJ4 Series

- The condition mentioned above is the temperature on the Cu foil of the PCB surface. There are cases where board's temperature greatly differs from switch's surface be used not to allow switch's surface temperature to exceed $260^{\circ} \mathrm{C}$.
- Manual Soldering

| Soldering Temperature | $350^{\circ} \mathrm{C}$ MAX. |
| :---: | :--- |
| Continuous Soldering Time | 5 second MAX. |

- Precautions in Handling

1. Care should be exercised so that flux from the upper part of the printed circuit board does not adhere to the switch.
2. Except for washable type do not wash the switch.

- Notes on storage conditions:

Do not store in the following environment or it may affect product's function and solderbility:

1. temperature of $-10(\max ) \sim+40(\min ){ }^{\circ} \mathrm{C}$ \& humidity at $85 \%$ (min)
2. environment with corrosive gas
3. storage over 6 months
4. place of direct sunlight
