## ON Semiconductor ${ }^{\oplus}$

## To learn more about ON Semiconductor, please visit our website at www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore ( $\_$), the underscore ( $\_$) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild questions@onsemi.com.

## FSA550

## 4PST Depletion Mode Isolation Switch

## Features

- 4PST (NC)
- Depletion Mode MOSFETs
- Audio Frequency Range
- $V_{\text {Cc(Off) }}$ : 1.6 V to 3.0 V
- Ron: $0.8 \Omega$ Typical
- Ron Flat: $0.01 \Omega$ Typical
- THD+N: 0.002\% Typical
- Eco Status: Fairchild Green, RoHS Compliant, Halogen Free

## Applications

- MP3 Portable Media Players
- Cellular Phones, Smart Phones

## Description

The FSA550 is a high-performance four-pole singlethrow (4PST) normally closed Depletion-Mode isolation switch. The Depletion Mode technology allows the device to conduct signals when there is no $\mathrm{V}_{\mathrm{cc}}$ available and to isolate the signals when $\mathrm{V}_{\mathrm{cc}}$ is present.

The FSA550 operates on a wide $\mathrm{V}_{\mathrm{CC}}$ range for design flexibility. Additionally, select pins allow the internal oscillator frequency to be adjusted between 500 kHz and 750 kHz in 75 kHz steps when $\mathrm{V}_{\mathrm{cc}}$ is present. This feature is used to shift the electromagnetic interference (EMI) signature to meet customer specifications.

| LOW | LOW | 500 kHz |
| LOW | HIGH | 575 kHz |
| HIGH | LOW | 650 kHz |
| HIGH | HIGH | 725 kHz |

## Absolute Maximum Ratings

Stresses exceeding the absolute maximum ratings may damage the device. The device may not function or be operable above the recommended operating conditions and stressing the parts to these levels is not recommended. In addition, extended exposure to stresses above the recommended operating conditions may affect device reliability. The absolute maximum ratings are stress ratings only.

| Symbol | Parameter |  | Min. | Max. | Unit |
| :---: | :---: | :---: | :---: | :---: | :---: |
| $\mathrm{V}_{\mathrm{Cc}}$ | Supply/Control Voltage |  | 0 | 4.6 | V |
| $\mathrm{V}_{\text {IN }}$ | Input Voltage (Select Pins) |  | 0 | $\mathrm{V}_{\mathrm{Cc}}$ | V |

| $\mathrm{T}_{\text {STG }}$ | Storage Temperature |  | -65 | +150 | ${ }^{\circ} \mathrm{C}$ |

## Note:

1. When a switch is isolated (OFF), $\mathrm{V}_{\mathrm{Sw}}$ value must be $<\mathrm{V}_{\mathrm{Cc}}$.

## Recommended Operating Conditions

The Recommended Operating Conditions table defines the conditions for actual device operation. Recommended operating conditions are specified to ensure optimal performance to the datasheet specifications. Fairchild does not recommend exceeding them or designing to Absolute Maximum Ratings.

| Symbol | Parameter | Min. | Max. | Unit |
| :---: | :--- | :---: | :---: | :---: |
| $\mathrm{V}_{\mathrm{CC}(\mathrm{ON})}$ | Supply Voltage with Switch Conducting | 0 | 0.2 | V |
| $\mathrm{~V}_{\mathrm{CC} \text { (OFF) }}$ | Supply Voltage with Switch Isolated | 1.6 | 3.0 | V |
| $\mathrm{~V}_{\text {SW(ON) }}$ | DC Switch I/O Voltage (Switch Conducting) | $\mathrm{V}_{\mathrm{CC}}=0 \mathrm{~V}$ | -2 | 2 |
| $\mathrm{~V}_{\text {Sw(OFF) }}$ | DC Switch I/O Voltage (Switch Isolated) | $\mathrm{V}_{\mathrm{CC}}=1.6 \mathrm{~V}$ to 3.0 V | 0 | 1.4 |

## DC Electrical Characteristics

Typical values at $\mathrm{T}_{\mathrm{A}}=25^{\circ} \mathrm{C}$ unless otherwise specified.

#### Abstract

ON Semiconductor and ON are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at www.onsemi.com/site/pdf/Patent-Marking.pdf. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
