

# NCS2004, NCS2004A

## Operational Amplifier, Rail-to-Rail, 3.5 MHz, Wide Supply

The NCS2004 operational amplifier provides rail-to-rail output operation. The output can swing within 70 mV to the positive rail and 30 mV to the negative rail. This rail-to-rail operation enables the user to make optimal use of the entire supply voltage range while taking advantage of 3.5 MHz bandwidth. The NCS2004 can operate on supply voltage as low as 2.5 V over the temperature range of  $-40^{\circ}\text{C}$  to  $125^{\circ}\text{C}$ . The high bandwidth provides a slew rate of  $2.4\text{ V}/\mu\text{s}$  while only consuming a typical  $390\text{ }\mu\text{A}$  of quiescent current. Likewise the NCS2004 can run on a supply voltage as high as 16 V making it ideal for a broad range of battery operated applications. Since this is a CMOS device it has high input impedance and low bias currents making it ideal for interfacing to a wide variety of signal sensors. In addition it comes in either a small SC-88A or UDFN package allowing for use in high density PCB's.

### Features

- Rail-To-Rail Output
- Wide Bandwidth: 3.5 MHz
- High Slew Rate:  $2.4\text{ V}/\mu\text{s}$
- Wide Power Supply Range: 2.5 V to 16 V
- Low Supply Current:  $390\text{ }\mu\text{A}$
- Low Input Bias Current:  $45\text{ pA}$
- Wide Temperature Range:  $-40^{\circ}\text{C}$  to  $125^{\circ}\text{C}$
- Small Packages: 5-Pin SC-88A and UDFN6 1.6x1.6
- These Devices are Pb-Free, Halogen Free/BFR Free and are RoHS Compliant

### Applications

- Notebook Computers
- Portable Instruments

ON Semiconductor®

## MAXIMUM RATINGS

Symbol	Rating	Value	Unit
V <sub>DD</sub>	Supply Voltage	16.5	V
V <sub>ID</sub>	Input Differential Voltage	± Supply Voltage	V
V <sub>I</sub>	Input Common Mode Voltage Range	-0.2 V to (V <sub>DD</sub> + 0.2 V)	V
I <sub>I</sub>	Maximum Input Current	± 10	mA
I <sub>O</sub>	Output Current Range	± 100	mA
	Continuous Total Power Dissipation (Note 1)	200	mW
T <sub>J</sub>	Maximum Junction Temperature	150	°C
θ <sub>JA</sub>	Thermal Resistance	333	°C/W
T <sub>stg</sub>	Operating Temperature Range (free-air)	-40 to 125	°C
T <sub>stg</sub>	Storage Temperature	-65 to 150	°C
	Mounting Temperature (Infrared or Convection – 20 sec)	260	°C
V <sub>ESD</sub>	Machine Model Human Body Model	300 2000	V

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

- Continuous short circuit operation to ground at elevated ambient temperature can result in exceeding the maximum allowed junction temperature of 150°C. Output currents in excess of 45 mA over long term may adversely affect reliability. Shorting output to either V+ or V- will adversely affect reliability.

## DC ELECTRICAL CHARACTERISTICS (V<sub>DD</sub> = 2.5 V, 3.3 V, 5 V and ±5 V, T<sub>A</sub> = 25°C, R<sub>L</sub> ≥ 10 kΩ unless otherwise noted)

Parameter	Symbol	Conditions	Min	Typ	Max	Unit

APPLICATIONS

Figure 31. Voltage Reference

Figure 32. Wien Bridge Oscillator

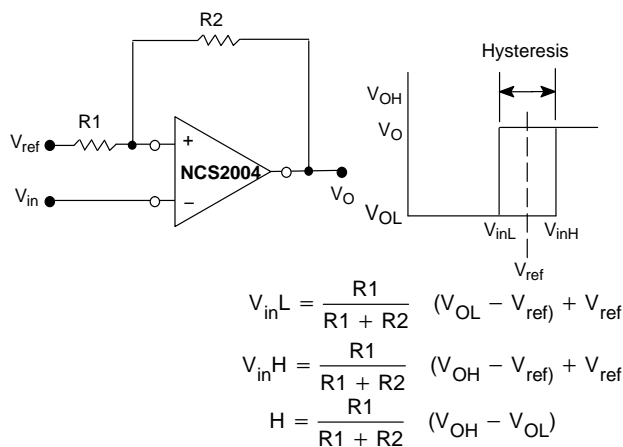

Figure 33. Comparator with Hysteresis

Given:  $f_o$  = center frequency  
 $A(f_o)$  = gain at center frequency

Choose value  $f_o, C$   
 Then:  $R_3 = \frac{Q}{\pi f_o C}$   
 $R_1 = \frac{R_3}{2 A(f_o)}$   
 $R_2 = \frac{R_1 R_3}{4Q^2 R_1 - R_3}$

For less than 10% error from operational amplifier,  
 $((Q_o f_o)/BW) < 0.1$  where  $f_o$  and  $BW$  are expressed in Hz.  
 If source impedance varies, filter may be preceded with voltage follower buffer to stabilize filter parameters.

### GENERIC MARKING DIAGRAM\*

- XX = Specific Device Code
- M = Date Code
- = Pb-Free Package

(Note: Microdot may be in either location)  
\*This information is generic. Please refer to device data sheet for actual part marking.  
Pb-Free indicator, "G" or microdot "■", may or may not be present.

SOLDERMASK DEFINED MOUNTING FOOTPRINT\*

DIMENSIONS: MILLIMETERS

\*For additional information on our Pb-Free strategy and soldering details, please download the ON Semiconductor Soldering and Mounting Techniques Reference Manual, SOLDERRM/D.

<b>DOCUMENT NUMBER:</b>	<b>98AON25711D</b>	Electronic versions are uncontrolled except when accessed directly from the Document Repository. Printed versions are uncontrolled except when stamped "CONTROLLED COPY" in red.
<b>DESCRIPTION:</b>	<b>6 PIN UDFN, 1.6X1.6, 0.5P</b>	<b>PAGE 1 OF 1</b>
