# Programmable Divide-By-N Dual 4-Bit Binary/BCD Down Counter

The MC14569B is a programmable divide—by—N dual 4—bit binary or BCD down counter constructed with MOS P—Channel and N—Channel enhancement mode devices (complementary MOS) in a monolithic structure.

This device has been designed for use with the MC14568B phase comparator/counter in frequency synthesizers, phase–locked loops, and other frequency division applications requiring low power dissipation and/or high noise immunity.

#### **Features**

- Speed-up Circuitry for Zero Detection
- Each 4-Bit Counter Can Divide Independently in BCD or Binary Mode
- Can be Cascaded With MC14526B for Frequency Synthesizer Applications
- All Outputs are Buffered
- Schmitt Triggered Clock Conditioning
- NLV Prefix for Automotive and Other Applications Requiring Unique Site and Control Change Requirements; AEC–Q100 Qualified and PPAP Capable
- This Device is Pb-Free and is RoHS Compliant

#### MAXIMUM RATINGS (Voltages Referenced to VSS)

| Symbol                             | Parameter   | Value                         | Unit |
|------------------------------------|---|-------------------------------|------|
| $V_{DD}$                           | DC Supply Voltage Range                           | -0.5 to +18.0                 | V    |
| V <sub>in</sub> , V <sub>out</sub> | Input or Output Voltage Range (DC or Transient)   | -0.5 to V <sub>DD</sub> + 0.5 | V    |
| I <sub>in</sub> , I <sub>out</sub> | Input or Output Current (DC or Transient) per Pin | ±10                           | mA   |
| P <sub>D</sub>                     | Power Dissipation, per Package (Note 1)           | 500                           | mW   |
| T <sub>A</sub>                     | Ambient Temperature Range                         | -55 to +125                   | °C   |
| T <sub>stg</sub>                   | Storage Temperature Range                         | -65 to +150                   | °C   |
| TL                                 | Lead Temperature (8–Second Soldering)             | 260                           | °C   |

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

1. Temperature Derating: "D/DW" Package: -7.0 mW/°C From 65°C To 125°C

This device contains protection circuitry to guard against damage due to high static voltages or electric fields. However, precautions must be taken to avoid applications of any voltage higher than maximum rated voltages to this high–impedance circuit. For proper operation,  $V_{in}$  and  $V_{out}$  should be constrained to the range  $V_{SS} \leq (V_{in} \text{ or } V_{out}) \leq V_{DD}.$ 

Unused inputs must always be tied to an appropriate logic voltage level (e.g., either  $V_{SS}$  or  $V_{DD}$ ). Unused outputs must be left open.

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

$$I_T(C_L) = I_T(50 \text{ pF}) + (C_L - 50) \text{ Vfk}$$

where:  $I_T$  is in  $\mu A$  (per package),  $C_L$  in pF,  $V = (V_{DD} - V_{SS})$  in volts, f in kHz is input frequency, and k = 0.001.

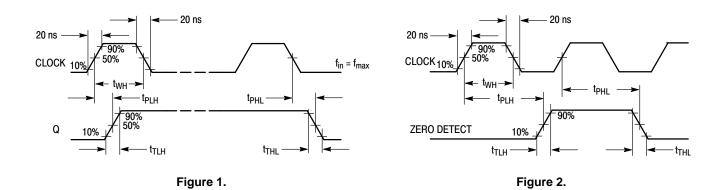

Data labelled "Typ" is not to be used for design purposes but is intended as an indication of the IC's potential performance.
 The formulas given are for the typical characteristics only at 25°C.
 To calculate total supply current at loads other than 50 pF:

## **SWITCHING WAVEFORMS**

#### PIN DESCRIPTIONS

#### **INPUTS**

**P0, P1, P2, P3 (Pins 3, 4, 5, 6)** – Preset Inputs. Programmable inputs for the least significant counter. May be binary or BCD depending on the control input.

**P4**, **P5**, **P6**, **P7** (**Pins 11**, **12**, **13**, **14**) – Preset Inputs. Programmable inputs for the most significant counter. May be binary or BCD depending on the control input.

**Clock (Pin 9)** – Preset data is decremented by one on each positive transition of this signal.

#### **OUTPUTS**

**Zero Detect (Pin 1)** – This output is normally low and goes high for one clock cycle when the counter has decremented to zero.

**Q** (**Pin 15**) – Output of the last stage of the most significant counter. This output will be inactive unless the preset input P7 has been set high.

#### **CONTROLS**

**Cascade Feedback (Pin 7)** – This pin is normally set high. When low, loading of the preset inputs (P0 through P7) is inhibited, i.e., P0 through P7 are "don't cares." Refer to Table 1 for output characteristics.

CTL<sub>1</sub> (Pin 2) – This pin controls the counting mode of the least significant counter. When set high, counting mode is BCD. When set low, counting mode is binary.

CTL<sub>2</sub> (Pin 10) – This pin controls the counting mode of the most significant counter. When set high, counting mode is BCD. When set low, counting mode is binary.

#### **SUPPLY PINS**

 $V_{SS}$  (Pin 18) – Negative Supply Voltage. This pin is usually connected to ground.

 $V_{DD}$  (Pin 16) – Positive Supply Voltage. This pin is connected to a positive supply voltage ranging from 3.0 V to 18 V.

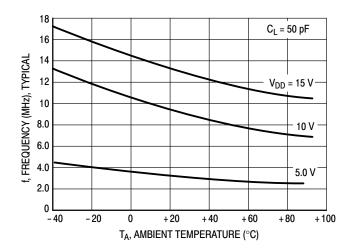

#### **OPERATING CHARACTERISTICS**

The MC14569B is a programmable divide–by–N dual 4–bit down counter. This counter may be programmed (i.e., preset) in BCD or binary code through inputs P0 to P7. For each counter, the counting sequence may be chosen independently by applying a high (for BCD count) or a low (for binary count) to the control inputs CTL<sub>1</sub> and CTL<sub>2</sub>.

The divide ratio N (N being the value programmed on the preset inputs P0 to P7) is automatically loaded into the counter as soon as the count 1 is detected. Therefore, a division ratio of one is not possible. After N clock cycles,

one pulse appears on the Zero Detect output. (See Timing Diagram.) The Q output is the output of the last stage of the most significant counter (See Tables 1 through 5, Mode Controls.)

When cascading the MC14569B to the MC14526B, the Cascade Feedback input, Q, and Zero Detect outputs must be respectively connected to "0", Clock, and Load of the following counter. If the MC14569B is used alone, Cascade Feedback must be connected to  $V_{\rm DD}$ .

**Table 1Mode Controls** (Cascade Feedback = Low)

| Counter Co       | ntrol Values     | Divide      | Divide Ratio |  |  |  |
|------------------|------------------|-------------|--------------|--|--|--|
| CTL <sub>1</sub> | CTL <sub>2</sub> | Zero Detect | Q            |  |  |  |
| 0                | 0                | 256         | 256          |  |  |  |
| 0                | 1                | 160         | 160          |  |  |  |
| 1                | 0                | 160         | 160          |  |  |  |
| 1                | 1                | 100         | 100          |  |  |  |

NOTE: Data Preset Inputs (P0–P7) are "Don't Cares" while Cascade Feedback is Low.

**Table 2Mode Controls** (CTL<sub>1</sub> = Low, CTL<sub>2</sub> = Low, Cascade Feedback = High)

## **SOLDERING FOOTPRINT**

#### NOTES:

- 1. DIMENSIONS ARE IN MILLIMETERS.
  2. INTERPRET DIMENSIONS AND TOLERANCES
  PER ASME Y14.5M, 1994.
- DIMENSIONS D AND E DO NOT INLCUDE MOLD PROTRUSION.
- MOLID PROTRUSION.
  MAXIMUM MOLID PROTRUSION 0.15 PER SIDE.
  DIMENSION B DOES NOT INCLUDE DAMBAR
  PROTRUSION. ALLOWABLE DAMBAR
  PROTRUSION SHALL BE 0.13 TOTAL IN EXCESS OF THE B DIMENSION AT MAXIMUM MATERIAL CONDITION.

ON Semiconductor does not convey any license under its patent rights nor the rights of others.

ON Semiconductor and (III) are trademarks of Semiconductor Components Industries, LLC dba ON Semiconductor or its subsidiaries in the United States and/or other countries. ON Semiconductor owns the rights to a number of patents, trademarks, copyrights, trade secrets, and other intellectual property. A listing of ON Semiconductor's product/patent coverage may be accessed at <a href="www.onsemi.com/site/pdf/Patent-Marking.pdf">www.onsemi.com/site/pdf/Patent-Marking.pdf</a>. ON Semiconductor reserves the right to make changes without further notice to any products herein. ON Semiconductor makes no warranty, representation or guarantee regarding the suitability of its products for any particular purpose, nor does ON Semiconductor assume any liability. arising out of the application or use of any product or circuit, and specifically disclaims any and all liability, including without limitation special, consequential or incidental damages. Buyer is responsible for its products and applications using ON Semiconductor products, including compliance with all laws, regulations and safety requirements or standards, regardless of any support or applications information provided by ON Semiconductor. "Typical" parameters which may be provided in ON Semiconductor data sheets and/or specifications can and do vary in different applications and actual performance may vary over time. All operating parameters, including "Typicals" must be validated for each customer application by customer's technical experts. ON Semiconductor does not convey any license under its patent rights nor the rights of others. ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or any devices intended for implantation in the human body. Should Buyer purchase or use ON Semiconductor products for any such unintended or unauthorized application, Buyer shall indemnify and hold ON Semiconductor and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor is an Equal Opportunity/Affirmative Action Employer. This literature is subject to all applicable copyright laws and is not for resale in any manner.
