## MC74LCX16374

## Low-Voltage CMOS 16-Bit D-Type Flip-Flop

## With 5 V-Tolerant Inputs and Outputs (3-State, Non-Inverting)

The MC74LCX16374 is a high performance, non-inverting 16-bit D-type flip-flop operating from a 2.3 V to 3.6 V supply. The device is byte controlled. Each byte has separate Output Enable and Clock Pulse inputs. These control pins can be tied together for full 16-bit operation. High impedance TTL compatible inputs significantly reduce current loading to input drivers while TTL compatible outputs offer improved switching noise performance. A $\mathrm{V}_{\mathrm{I}}$ specification of 5.5 V allows MC74LCX16374 inputs to be safely driven from 5.0 V devices.

The MC74LCX16374 consists of 16 edge-triggered flip-flops with individual D-type inputs and 5.0 V-tolerant 3-state true outputs. The buffered clocks ( CPn ) and buffered Output Enables $(\overline{\mathrm{OEn}})$ are common to all flip-flops within the respective byte. The flip-flops will store the state of individual D inputs that meet the setup and hold time requirements on the LOW-to-HIGH Clock (CP) transition. With the $\overline{\mathrm{OE}}$ LOW, the contents of the flip-flops are available at the outputs. When the $\overline{\mathrm{OE}}$ is HIGH, the outputs go to the high impedance state. The $\overline{\mathrm{OE}}$ input level does not affect the operation of the flip-flops.

## Features

- Designed for 2.3 to 3.6 V VCC Operation
- 6.2 ns Maximum $\mathrm{t}_{\mathrm{pd}}$
- 5.0 V Tolerant - Interface Capability With 5.0 V TTL Logic
- Supports Live Insertion and Withdrawal
- $\mathrm{I}_{\mathrm{OFF}}$ Specification Guarantees High Impedance When $\mathrm{V}_{\mathrm{CC}}=0 \mathrm{~V}$
- LVTTL Compatible
- LVCMOS Compatible
- 24 mA Balanced Output Sink and Source Capability
- Near Zero Static Supply Current in All Three Logic States (20 $\mu \mathrm{A}$ ) Substantially Reduces System Power Requirements
- Latchup Performance Exceeds 500 mA
- ESD Performance:
- Human Body Model > 2000 V
- Machine Model >200 V
- These Devices are $\mathrm{Pb}-\mathrm{Fr} e \mathrm{e}$, Halogen Free/BFR Free and are RoHS Compliant
