1. DC Interrupting Rating (Measured at rated voltage, time constant of less than 50 microseconds, battery source)
2. DC Cold Resistance are measured at <10% of rated current in ambient temperature of 25°C
3. Typical Pre-arcing I²t are measured at 10In Current Choice fuse for surge application (USB charger etc.), make sure the I²t of fuse is 4 times than surge.
4. Specifications are subject to change without notice. Application testing is strongly recommended.
