Storage conditions/Note things:

1. Storage temperature and humidity conditions :

1.1. Product packing with Carrier tape: -5°C~+40°C and less than 60% RH.

1.2. Product alone: -20°C~+60°C and less than 60% RH.

2. Products should be used within 6 months.(Note that the product should be used as soon as possible once it is folded) .

3. The packaging material should be kept where no chlorine or sulfur exists in the air.

4. Do not touch the electrodes (soldering terminals) with fingers as this may lead to deterioration of solder ability.

5. The use of tweezers or vacuum pick-ups is strongly recommended for individual components.Bulk handling should ensure that abrasion and mechanical shock are minimized.
