

## 400mA Current、15V Input Voltage LDO

### H72XX-1

#### General Description

The H72XX-1 series is a group of positive voltage output, three-pin regulators, that provide a high current even when the input/output voltage differential is small. Low power consumption and high accuracy is achieved through CMOS and laser trimming technologies.

The H72XX-1 consists of a high-precision voltage reference, an error amplification circuit, and a current limited output driver. Transient response to load variations have improved in comparison to the existing series. SOT89-3, SOT23-3 and SOT23-5 packages are

available.
