

**Voidless Hermetically Sealed Surface Mount Bidirectional Transient Voltage Suppressors**  
 Qualified to MIL-PRF-19500/516

*Qualified Levels:*  
 JAN, JANTX, JANTXV  
 and JANS\*

**DESCRIPTION**

This surface mount series of industry recognized voidless, hermetically sealed, bidirectional Transient Voltage Suppressors (TVS) designs is military qualified to MIL-PRF-19500/516 and is ideal for high-reliability applications where a failure cannot be tolerated. They provide a Working Peak “Standoff” Voltage selection from 5.7 to 152 Volts with a 500 W rating for a 10/1000  $\mu$ s pulse. They are very robust in hard-glass construction and internal “Category 1” metallurgical bonds. These are also available as both a non-suffix part and an “A” version providing different voltage tolerances as described in the nomenclature section. These devices are also available in axial-leaded packages for thru-hole mounting.
