General Description

TP8008A is a high-efficiency DC to DC step down switching regulator, capable of delivering up to 1A output current. The TP8008A operates in a wide range input voltage from 2.7V to 5.5V making the IC ideal for low voltage power conversions. Running at a fixed frequency of 1.5MHz allows the use of small inductance value and low DCR inductors, thereby achieving higher efficiency.
