CHECK	7 Hobayashi
	HIROKAZU KOUMURA
APPROVAL	H. Koumura

	PAGE	1 / 10
<ol> <li>Scope.</li> <li>This specification covers polarized aluminum electrolytic capacitors with non-solid electrolyte for use in electronic</li> </ol>	c equipments .	
<ol> <li>Reference Standard JIS C 5141 (1991) and JIS C 5102 (1994) methods for testing.</li> </ol>		
3. Operating Temperature Range -40°C to +105°C		
4. Performance Refer to Table-1		
5. Style and Numbering System (1) Style CE 04 (Radial Leaded)		
(2) Numbering System Rated Series Nominal Tolerance Option Lead Case s Voltage Capacitance Forming <u> DDD YXF</u> <u> M</u> <u> FFC</u> <u> DD</u> <u> Capacitance M</u> <u> FFC</u> <u> Capacitance M</u> <u> Capacitance M</u> <u> FFC</u> <u> DD</u> <u> Capacitance M</u> <u> Capaci</u>		
<ol> <li>Marking Unless otherwise specified, capacitor shall be clearly marked the following items on its body. Sleeve color: Black Lettering color: White</li> </ol>		
(1) Trade mark <b>Rubycon</b>		
<ul> <li>(2) Rated Voltage</li> <li>(3) Nominal Capacitance</li> <li>(4) Polarity</li> <li>(Negative Polarity)</li> </ul>		
(5) Series YXF (6) Date code		
<ul> <li>(7) Maximum Operating Temperature 105°C</li> <li>(8) PET Sleeve mark PET</li> </ul>		
<ol> <li>Vent On capacitors whose diameter is 6.3mm and greater, a safety vent shall be provided.</li> </ol>		
<ul> <li>8. Notes on use of aluminum electrolytic capacitors</li> <li>(1) Charge and discharge</li> <li>Do not use for the circuit that repeats quick charge or discharge.</li> </ul>		
(2) External stress Do not apply excessive force of pushing, pulling bending, and/or twisting to the main body, lead wire and te	rminals.	
(3) Heat resistance at soldering process In the soldering process of PC board with Capacitors mounted, secondary shrinkage or crack of sleeve soldering temperature is too high and /or soldering time is too long. If lead wire of other components or pattern of double sided PC board touches the capacitor, the sim originated at pre-heating, heating at hardening process of adhesive and soldering process.		
<ul> <li>(4) Insulation and PC board mounting Sleeve is for marking purpose only.</li> <li>It is not recognized as insulation materials.</li> <li>When double sided PC board is employed, note that it could cause a short circuit if lead wire of other c double sided PC board touches capacitor. Please avoid circuit pattern runs underneath capacitor.</li> <li>In addition, case and cathode terminal are not insulated.</li> </ul>	omponents or p	attern of
(5) Adhesives and coating materials Do not use the adhesives and coating materials that contain halogenated organic solvents or chloroprene a	s polymer.

. ,	) Storage Keep at a normal temperat any trouble that high leakage a long time.												
<8	<storage condition="">     *Aluminum electrolytic capacitors should not be stored in high temperatures or where there is a high level of humidity. The suitable storage condition is 5°C-35°C and less than 75% in relative humidity.     *Aluminum electrolytic capacitors should not be stored in damp conditions such as water, saltwater spray or oil spray.     *Do not store aluminum electrolytic capacitors in an environment full of hazardous gas (hydrogen sulfide, sulfurous acid gas, nitrous acid, chlorine gas, ammonia or bromine gas).     *Aluminum electrolytic capacitors should not be stored under exposure to ozone, ultraviolet rays or radiation.</storage>												
(7)	<ul> <li>(7) Fumigation and halogenated flame retardant         It may cause corrosion of internal electrodes, aluminum cases and terminal surface when the following conditions exist.         *Fumigation of wooden pallets before shipment to disinfect vermin.         *Existence of components or parts that contain halogenated flame retardant agent (bromine etc.) together with capacitors.         *When halogenated detergents of antiseptics for preventing infection of epidemic diseases contact directly to capacitors.     </li> </ul>												
(8)	PC board cleaning after sold Please consult us when cle
