

SGM8931/SGM8932 SGM8933/SGM8934 1.5MHz, Rail-to-Rail Output Operational Amplifiers

GENERAL DESCRIPTION

The SGM8931/2/3/4 are a family of single, dual and quad operational amplifiers designed for 5V operation. These devices can operate from 1.8V to 5.5V single supply. They provide a wide input common mode voltage range and rail-to-rail output voltage swing.

The SGM8931/2/3/4 provide excellent overall performance. They feature low offset, low noise and low distortion. These devices work well in low voltage or battery-powered audio systems requiring high quality.

The SGM8931 is available in Green SOT-23-5, SC70-5, SOIC-8 and MSOP-8 packages. The SGM8932 is available in Green SOIC-8 and MSOP-8 packages. The SGM8933 is available in Green SOT-23-6, SOIC-8 and MSOP-8 packages. The SGM8934 is available in Green SOIC-14 and TSSOP-14 packages. They are specified over the -40°C to +85°C temperature range.

-----------------------------------	----------------

OVERSTRESS CAUTION

Stresses beyond those listed in Absolute Maximum Ratings may cause permanent damage to the device. Exposure to absolute maximum rating conditions for extended periods

may affect reliability. Functional operation of the device at any conditions beyond those indicated in the Recommended Operating Conditions section is not implied.

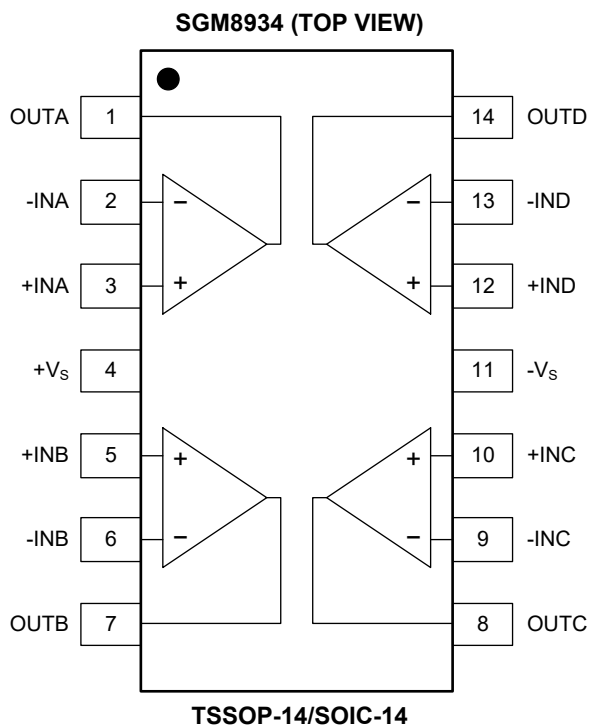

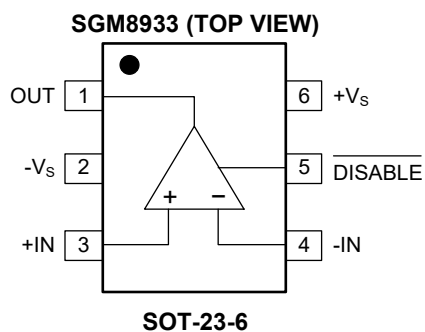

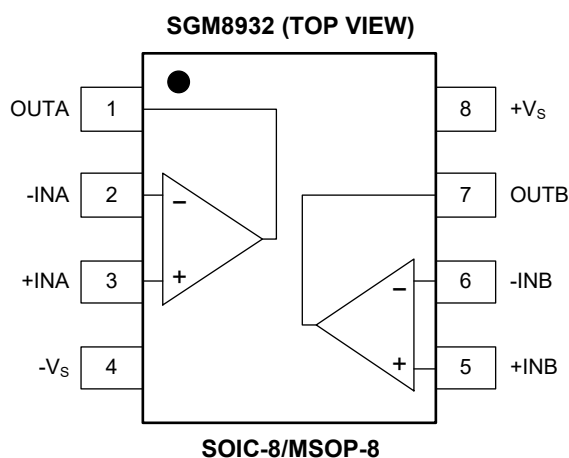

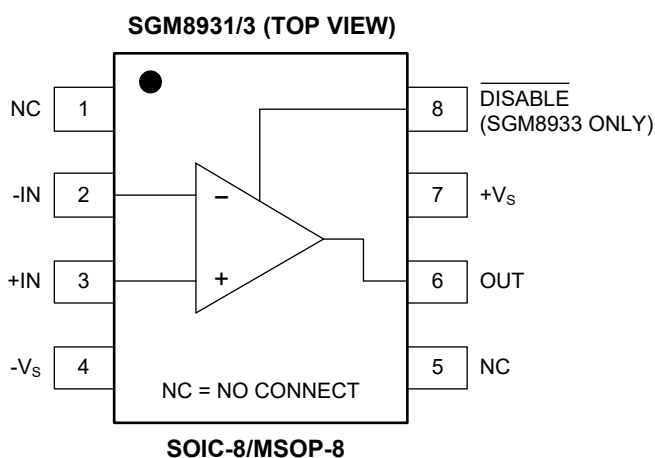

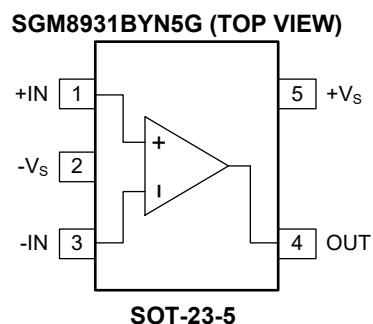

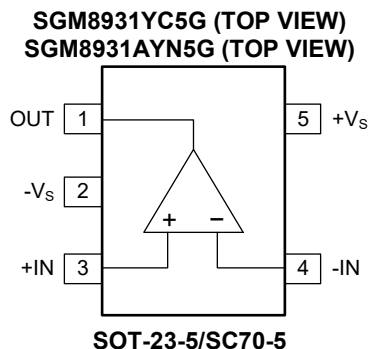

ESD SENSITIVITY CAUTION

This integrated circuit can be damaged if ESD protections are not considered carefully. SGMICRO recommends that all integrated circuits be handled with appropriate precautions. Failure to observe proper handling and installation procedures can cause damage. ESD damage can range from subtle performance degradation to complete device failure. Precision integrated circuits may be more susceptible to damage because even small parametric changes could cause the device not to meet the published specifications.
