# MOSFET – Power, Single N-Channel 40 V, 7.3 mΩ, 52 A

#### Features

- Small Footprint (5x6 mm) for Compact Design
- Low R<sub>DS(on)</sub> to Minimize Conduction Losses
- Low Capacitance to Minimize Driver Losses
- LFPAK4 Package, Industry Standard
- AEC-Q101 Qualified and PPAP Capable
- These Devices are Pb-Free and are RoHS Compliant

#### MAXIMUM RATINGS (T<sub>J</sub> = 25°C unless otherwise noted)

| Parameter   |  |                        | Symbol                            | Value          | Unit |
|---|--|------------------------|-----------------------------------|----------------|------|
| Drain-to-Source Voltage   |  |                        | V <sub>DSS</sub>                  | 40             | V    |

| Source Current (Body Diode)   |  |                        | ۱ <sub>S</sub>                    | 31             | А    |
| Single Pulse Drain-to-Source Avalanche<br>Energy (I <sub>L(pk)</sub> = 2.9 A) |  |                        | E <sub>AS</sub>                   | 65             | mJ   |
| Lead Temperature for Soldering Purposes (1/8" from case for 10 s)             |  |                        | ΤL                                | 260            | °C   |

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

#### THERMAL RESISTANCE MAXIMUM RATINGS (Note 1)

| Parameter                                   | Symbol           | Value | Unit |
|---|------------------|-------|------|
| Junction-to-Case - Steady State (Note 3)    | $R_{\theta JC}$  | 4.0   | °C/W |
| Junction-to-Ambient - Steady State (Note 3) | R <sub>θJA</sub> | 39    |      |

- 1. The entire application environment impacts the thermal resistance values shown, they are not constants and are only valid for the particular conditions noted.
- 2. Psi  $(\Psi)$  is used as required per JESD51-12 for packages in which substantially less than 100% of the heat flows to single case surface.
- 3. Surface-mounted on FR4 board using a 650 mm<sup>2</sup>, 2 oz. Cu pad.
- Continuous DC current rating. Maximum current for pulses as long as 1 second is higher but is dependent on pulse duration and duty cycle.

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions. 5. Pulse Test: Pulse Width  $\leq$  300  $\mu$ s, Duty Cycle  $\leq$  2%. 6. Switching characteristics are independent of operating junction temperatures.
