## **ON Semiconductor**®

# To learn more about ON Semiconductor, please visit our website at <u>www.onsemi.com</u>

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (\_), the underscore (\_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (\_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at <a href="mailto:www.onsemi.com">www.onsemi.com</a>. Please email any questions regarding the system integration to <a href="mailto:Fairchild\_questions@onsemi.com">Fairchild\_questions@onsemi.com</a>.

ON Semiconductor products are not designed, intended, or authorized for use as a critical component in life support systems or any FDA Class 3 medical devices or medical devices with a same or similar classification in a foreign jurisdiction or unavteries, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out or i, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that ON Semiconductor was negligent regarding the design or manufacture of the part. ON Semiconductor and is officers, employees, uniotificated use, even if such claim any manner.

FDMD86100

# Dual N-Channel Shielded Gate PowerTrench<sup>®</sup> MOSFET 100 V, 39 A, 10.5 m $\Omega$

### Features

- Common source configuration to eliminate PCB routing
- Large source pad on bottom of package for enhanced thermals
- Shielded Gate MOSFET Technology
- Max  $r_{DS(on)}$  = 10.5 m $\Omega$  at V<sub>GS</sub> = 10 V, I<sub>D</sub> = 10 A
- Max r<sub>DS(on)</sub> = 17.3 mΩ at V<sub>GS</sub> = 6 V, I<sub>D</sub> = 7.8 A
- Ideal for flexible layout in secondary side synchronous rectification
- Termination is Lead-free and RoHS Compliant
- 100% UIL tested

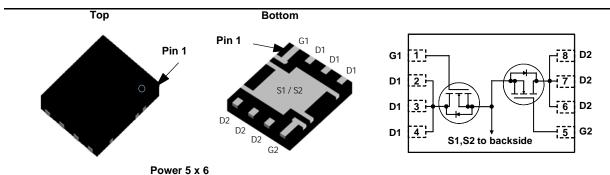

### **General Description**

This package integrates two N-Channel devices connected internally in common-source configuration and incorporates Shielded Gate technology. This enables very low package parasitics and optimized thermal path to the common source pad on the bottom. Provides a very small footprint (5 x 6 mm) for higher power density.

### Applications

- Isolated DC-DC Synchronous Rectifiers
- Common Ground Load Switches

MOSFET Maximum Ratings T<sub>A</sub> = 25 °C unless otherwise noted

NOTES:

1.  $R_{0,A}$  is determined with the device mounted on a 1 in<sup>2</sup> pad 2 oz copper pad on a 1.5 x 1.5 in. board of FR-4 material.  $R_{0CA}$  is determined by the user's board design.

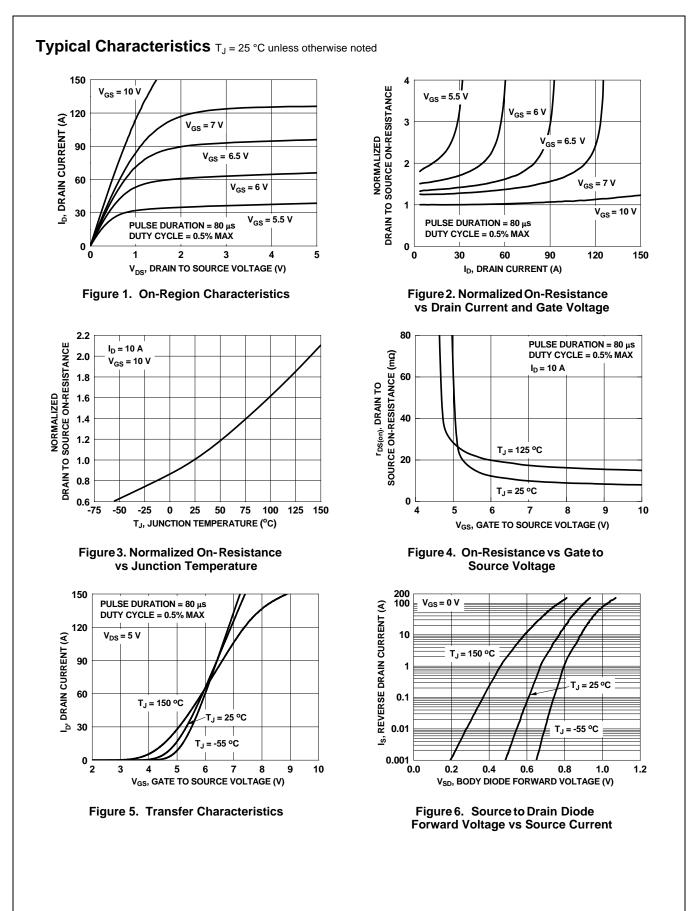

00000 o pps s s

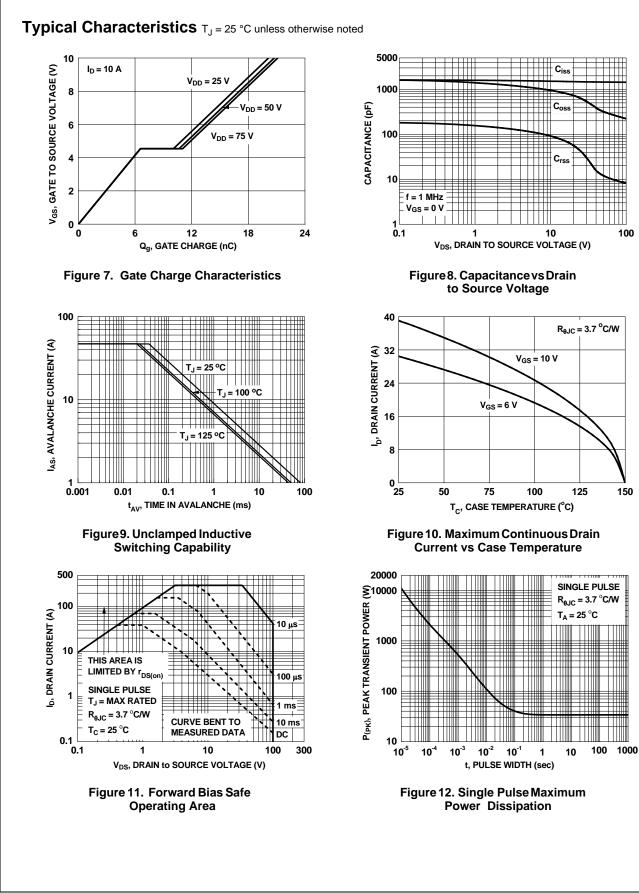

b.125 °C/W when mounted on a minimum pad of 2 oz copper

2. Pulse Test: Pulse Width < 300  $\mu$ s, Duty cycle < 2.0 %. 3. E<sub>AS</sub> of 337 mJ is based on starting T<sub>J</sub> = 25 °C, L = 3 mH, I<sub>AS</sub> = 15 A, V<sub>DD</sub> = 100 V, V<sub>GS</sub> = 10 V. 100% tested at L = 0.1 mH, I<sub>AS</sub> = 47 A.

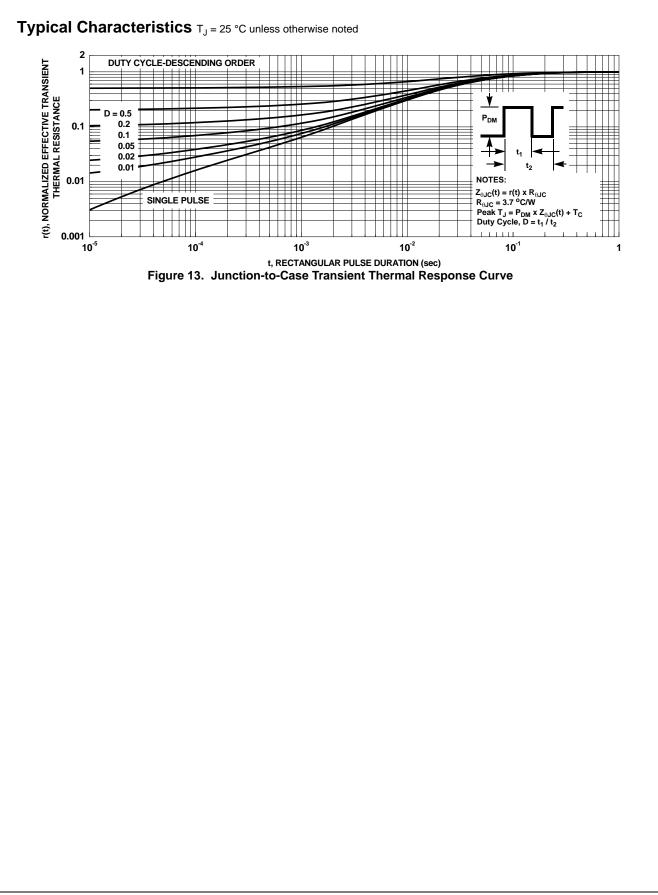

4. Pulsed Id please refer to Fig 11 SOA graph for more details.

5. Computed continuous current limited to Max Junction Temperature only, actual continuous current will be limited by thermal & electro-mechanical application board design.
