

DESCRIPTION:

With high ability to withstand the shock loading of Large current, BTA24/BTB24 series triacs provide high dv/dt rate with strong resistance to electromagnetic interface. With high commutation performances, 3 quadrants products especially recommended for use on inductive load. From all three terminals to external heatsink, BTA24 provides a rated insulation voltage of 2500 V_{RMS} complying with UL standards (File ref: E516503).
