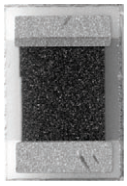
Thin Film Microwave Resistor



Product may not be to scale

The MIF resistor chips on alumina are designed with low shunt capacitance. Resistor geometrics are compatible with strip lines, making them ideally suited for microwave circuits.

These chips are manufactured using Vishay Electro-Films (EFI) sophisticated thin film equipment and manufacturing technology. The MIFs are 100 % electrically tested and visually inspected to MIL-STD-883, method 2032 class H or K.
