

## DS25CP152Q Automotive 3.125 Gbps LVDS 2x2 Crosspoint Switch

Check for Samples: [DS25CP152Q](#)

### FEATURES

- AECQ-100 Grade 3
- DC - 3.125 Gbps Low Jitter, Low Skew, Low Power Operation
- Pin Configurable, Fully Differential, Non-Blocking Architecture
- On-chip 100Ω Input and Output Terminations Minimize Return Losses, Reduce Component Count and Minimize Board Space
- 8 kV ESD on LVDS I/O Pins Protects Adjoining Components
- Small 4 mm x 4 mm WQFN-16 Space Saving Package

### APPLICATIONS

- Automotive Display Applications
- Clock and Data Buffering and Muxing
- OC-48 / STM-16
- SD/HD/3G HD SDI Routers

### Typical Application

### DESCRIPTION

The DS25CP152Q is a 3.125 Gbps 2x2 LVDS crosspoint switch optimized for high-speed signal routing and switching over lossy FR-4 printed circuit board backplanes and balanced cables. Fully differential signal paths ensure exceptional signal integrity and noise immunity. The non-blocking architecture allows connections of any input to any output or outputs.

Wide input common mode range allows the switch to accept signals with LVDS, CML and LVPECL levels; the output levels are LVDS. A very small package footprint requires a minimal space on the board while the flow-through pinout allows easy board layout. Each differential input and output is internally terminated with a 100Ω resistor to lower device return losses, reduce component count and further minimize board space.

Please be aware that an important notice concerning availability, standard warranty, and use in critical applications of Texas Instruments semiconductor products and disclaimers thereto appears at the end of this data sheet.

**Figure 1. DS25CP152Q Pin Diagram**

**PIN DESCRIPTIONS**

| Pin Name                   | Pin Number    | I/O, Type | Pin Description  |
|----------------------------|---------------|-----------|--|
| IN0+, IN0-, IN1+, IN1-     | 1, 2, 3, 4    | I, LVDS   | Inverting and non-inverting high speed LVDS input pins.                    |
| OUT0+, OUT0-, OUT1+, OUT1- | 12, 11, 10, 9 | O, LVDS   | Inverting and non-inverting high speed LVDS output pins.                   |
| SEL0, SEL1                 | 7, 8          | I, LVCMOS | Switch configuration pins. There is a 20 kΩ pulldown resistor on each pin. |
| EN0, EN1                   | 14, 13        | I, LVCMOS | Output enable pins. There is a 20 kΩ pulldown resistor on each pin.        |
| NC                         | 6, 15         | I, LVCMOS | "NO CONNECT" pins.   |
| VDD                        | 16            | Power     | Power supply pin.  |
| GND                        | 5, DAP        | Power     | Ground pin and Device Attach Pad (DAP) ground.                             |

These devices have limited built-in ESD protection. The leads should be shorted together or the device placed in conductive foam during storage or handling to prevent electrostatic damage to the MOS gates.

**Absolute Maximum Ratings<sup>(1)(2)</sup>**

|  |                              |
|--|------------------------------|
| Supply Voltage                             | -0.3V to +4V                 |

- (1) Absolute Maximum Ratings indicate limits beyond which damage to the device may occur, including inoperability and degradation of device reliability and/or performance. Functional operation of the device and/or non-degradation at the Absolute Maximum Ratings or other conditions beyond those indicated in the Recommended Operating Conditions is not implied. The Recommended Operating Conditions indicate conditions at which the device is functional and the device should not be operated beyond such conditions.
- (2) If Military/Aerospace specified devices are required, please contact the TI Sales Office/Distributors for availability and specifications.
- (3) Human Body Model, applicable std. JESD22-A114C
- (4) Machine Model, applicable std. JESD22-A115-A
- (5) Field Induced Charge Device Model, applicable std. JESD22-C101-C

**Recommended Operating Conditions**

|  | Min | Typ | Max | Units |
|--|-----|-----|-----|-------|
| Supply Voltage ( $V_{CC}$ )                      | 3.0 | 3.3 | 3.6 | V     |
| Receiver Differential Input Voltage ( $V_{ID}$ ) | 0   |     | 1   | V     |
| Operating Free Air Temperature ( $T_A$ )         | -40 | +25 | +85 | °C    |

**DC Electrical Characteristics**

 Over recommended operating supply and temperature ranges unless otherwise specified. <sup>(1)(2)(3)</sup>

| $I_{IL}$                        | Low Level Input Current  | $V_{IN} = GND$<br>$V_{CC} = 3.6V$  |     | 0   | ±10      | μA    |

- (1) The [Electrical Characteristics](#) tables list ensure specifications under the listed Recommended Operating Conditions except as otherwise modified or specified by the Electrical Characteristics Conditions and/or Notes. Typical specifications are estimations only and are not ensured.
- (2) Current into device pins is defined as positive. Current out of device pins is defined as negative. All voltages are referenced to ground except  $V_{OD}$  and  $\Delta V_{OD}$ .
- (3) Typical values represent most likely parametric norms for  $V_{CC} = +3.3V$  and  $T_A = +25°C$ , and at the Recommended Operating Conditions at the time of product characterization and are not ensured.

| t <sub>PLHD</sub>                    | Differential Propagation Delay Low to High                            | R <sub>L</sub> = 100Ω |     | 340 | 500 | ps    |
| t <sub>PHLD</sub>                    | Differential Propagation Delay High to Low                            |                       |     | 344 | 500 | ps    |
| t <sub>SKD1</sub>                    | Pulse Skew  t <sub>PLHD</sub> - t <sub>PHLD</sub>  <br><sup>(4)</sup> |                       |     | 4   | 35  | ps    |
| t <sub>SKD2</sub>                    | Channel to Channel Skew<br><sup>(5)</sup>                             |                       |     | 12  | 40  | ps    |
| t <sub>SKD3</sub>                    | Part to Part Skew<br><sup>(6)</sup>                                   |                       |     | 50  | 150 | ps    |

- (1) The [Electrical Characteristics](#) tables list ensured specifications under the listed Recommended Operating Conditions except as otherwise modified or specified by the Electrical Characteristics Conditions and/or Notes. Typical specifications are estimations only and are not ensured.
- (2) Typical values represent most likely parametric norms for V<sub>CC</sub> = +3.3V and T<sub>A</sub> = +25°C, and at the Recommended Operation Conditions at the time of product characterization and are not ensured.
- (3) Specification is ensured by characterization and is not tested in production.
- (4) t<sub>SKD1</sub>, |t<sub>PLHD</sub> - t<sub>PHLD</sub>|, Pulse Skew, is the magnitude difference in differential propagation delay time between the positive going edge and the negative going edge of the same channel.
- (5) t<sub>SKD2</sub>, Channel to Channel Skew, is the difference in propagation delay (t<sub>PLHD</sub> or t<sub>PHLD</sub>) among all output channels in Broadcast mode (any one input to all outputs).
- (6) t<sub>SKD3</sub>, Part to Part Skew, is defined as the difference between the minimum and maximum differential propagation delays. This specification applies to devices at the same V<sub>CC</sub> and within 5°C of each other within the operating temperature range.

### AC Test Circuits and Timing Diagrams

### FUNCTIONAL DESCRIPTION

The DS25CP152Q is a 3.125 Gbps 2x2 LVDS digital crosspoint switch optimized for high-speed signal routing and switching over lossy FR-4 printed circuit board backplanes and balanced cables.

### Switch Configuration Truth Table

| S1 | S0 | OUT1 | OUT0 |
|----|----|------|------|
| 0  | 0  | IN0  | IN0  |
| 0  | 1  | IN0  | IN1  |
| 1  | 0  | IN1  | IN0  |
| 1  | 1  | IN1  | IN1  |

### Output Enable Truth Table

| EN1 | EN0 | OUT1     | OUT0     |
|-----|-----|----------|----------|
| 0   | 0   | Disabled | Disabled |
| 0   | 1   | Disabled | Enabled  |
| 1   | 0   | Enabled  | Disabled |
| 1   | 1   | Enabled  | Enabled  |

### Input Interfacing

The DS25CP152Q accepts differential signals and allows simple AC or DC coupling. With a wide common mode range, the DS25CP152Q can be DC-coupled with all common differential drivers (i.e. LVPECL, LVDS, CML). The following three figures illustrate typical DC-coupled interface to common differential drivers. Note that the DS25CP152Q inputs are internally terminated with a 100Ω resistor.

Figure 2. Typical LVDS Driver DC-Coupled Interface to DS25CP152Q Input

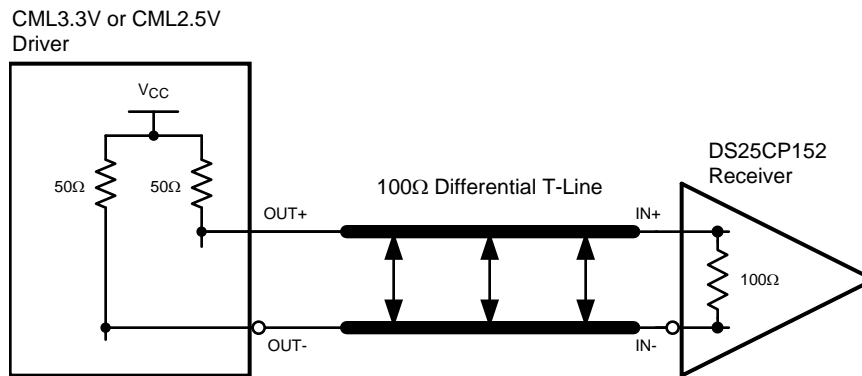

Figure 3. Typical CML Driver DC-Coupled Interface to DS25CP152Q Input

Figure 4. Typical LVPECL Driver DC-Coupled Interface to DS25CP152Q Input

### Output Interfacing

The DS25CP152Q outputs signals that are compliant to the LVDS standard. Its outputs can be DC-coupled to most common differential receivers. The following figure illustrates typical DC-coupled interface to common differential receivers and assumes that the receivers have high impedance inputs. While most differential receivers have a common mode input range that can accommodate LVDS compliant signals, it is recommended to check the respective receiver's data sheet prior to implementing the suggested interface implementation.

Figure 5. Typical DS25CP152Q Output DC-Coupled Interface to an LVDS, CML or LVPECL Receiver

(1) The marketing status values are defined as follows:

**ACTIVE:** Product device recommended for new designs.

**LIFEBUY:** TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

**NRND:** Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

**PREVIEW:** Device has been announced but is not in production. Samples may or may not be available.

**OBSOLETE:** TI has discontinued the production of the device.

(2) **RoHS:** TI defines "RoHS" to mean semiconductor products that are compliant with the current EU RoHS requirements for all 10 RoHS substances, including the requirement that RoHS substance do not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, "RoHS" products are suitable for use in specified lead-free processes. TI may reference these types of products as "Pb-Free".

**RoHS Exempt:** TI defines "RoHS Exempt" to mean products that contain lead but are compliant with EU RoHS pursuant to a specific EU RoHS exemption.

**Green:** TI defines "Green" to mean the content of Chlorine (Cl) and Bromine (Br) based flame retardants meet JS709B low halogen requirements of <=1000ppm threshold. Antimony trioxide based flame retardants must also meet the <=1000ppm threshold requirement.

(3) MSL, Peak Temp. - The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

(4) There may be additional marking, which relates to the logo, the lot trace code information, or the environmental category on the device.

(5) Multiple Device Markings will be inside parentheses. Only one Device Marking contained in parentheses and separated by a "~" will appear on a device. If a line is indented then it is a continuation of the previous line and the two combined represent the entire Device Marking for that device.

(6) Lead finish/Ball material - Orderable Devices may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

**Important Information and Disclaimer:**The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

**TAPE AND REEL INFORMATION**

RGH (S-PQFP-N16)

PLASTIC QUAD FLATPACK

4207066/B 02/2006

- NOTES:
- A. All linear dimensions are in millimeters. Dimensioning and tolerancing per ASME Y14.5M-1994.
  - B. This drawing is subject to change without notice.
  - C. QFN (Quad Flatpack No-Lead) package configuration.
  - The package thermal pad must be soldered to the board for thermal and mechanical performance. See the Product Data Sheet for details regarding the exposed thermal pad dimensions.
  - Pin 1 identifiers are located on both top and bottom of the package and within the zone indicated. The Pin 1 identifiers are either a molded, marked, or metal feature.
  - F. Complies to JEDEC MO-220 variation WGGD-4.
