

# Compact Low-profile Connector

## **MX77** Series

CONNECTOR MB-0326-2 Jul.2020

To cater to the demand for compact and low profile automotive connectors, an MX77D variation featuring 0.4mm tab size with added height-reduction has been added to the MX77 Series lineup.

### Applicable Market

General purpose automotive electrical control units (ECU), battery system components for electric vehicles (EV), and battery management system applications (BMS), flame-retardant material

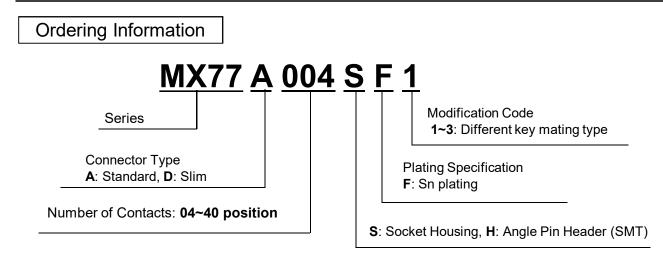

#### Features

•Ultra compact type 0.4mm tab size (pin width)

- ·Pin header side insulator uses flame-retardant UL94 V-0 material
- ·Socket side (cable connection) offers two housing models.
- •MX77D FLRY-B 0.35mm<sup>2</sup> cable is suggested for socket side cavities.
- •The pin side are SMT-mounted to save space, and are fixed to the board by soldering the legs to the board using a through-hole reflow process to ensure sufficient strength
- USCAR2 tested

Number of Contacts	4, 8, 12, 16, 20, 24, 32, 40
Rated Current	3A
Operating Temperature	-40°C ~ +85°C
Maximum Operating Temperature	130°C (Ambient temperature + temperature rise due to conduction)
Contact Resistance	Initial: $5m\Omega$ max., posttest: $10m\Omega$ max.

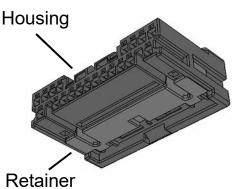

### General Specifications

Materials and Finishes

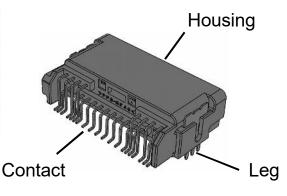

## Socket Housing

Component	Material
Housing	PBT
Retainer	PBT

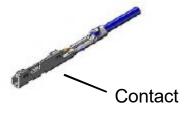

## Angle Pin Header

Component	Material / Finish
Housing	PPS-GF40
Contact	Copper Alloy / Sn plating
Leg	Brass / Sn plating

## Socket Contact

Component	Material / Finish
Contact	Copper Alloy / Sn plating

#### Notice:

1. The values specified in this brochure are only for reference. The products and their specifications are subject to change without notice. Contact our sales staff for further information before considering or ordering any of our products. For purchase, a product specification must be agreed upon.

2. Users are requested to provide protection circuits and redundancy circuits to ensure safety of the equipment, and sufficiently review the suitability of JAE's products to the equipment.

3. The products presented in this brochure are designed for the uses recommended below.

51.3

We strongly suggest you contact our sales staff when considering use of any of the products in any other way than the recommended applications or for a specific use that requires an extremely high reliability.

40 positon

(1) Applications that require consultation:(i) Please contact us if you are considering use involving a quality assurance program that you specify or that is peculiar to the industry, such as:

Automotive electrical components, train control, telecommunications devices (mainline), traffic light control, electric power, combustion control, fire prevention or security systems, disaster prevention equipment, etc.

(ii) We may separately give you our support with a quality assurance program that

you specify, when you think of a use such as :

Aviation or space equipment, submarine repeaters, nuclear power control systems, medical equipment for life support, etc.

(2) Recommended applications include:

Computers, office appliances, telecommunications devices (terminals, mobile units), measuring equipment, audiovisual equipment, home electric appliances, factory automation equipment, etc.
