

General Description

The SE78XX series are three terminal positive voltage regulators designed for a wide variety of applications including local, on-card regulation.

The SE78XX is complete with internal current limiting, thermal shutdown protection, and safe-area compensation which make them virtually immune from output overload. If adequate heat sinking is provided, these regulators can deliver output currents up to 1A.

The SE78XX are available in TO220 and TO252 packages.

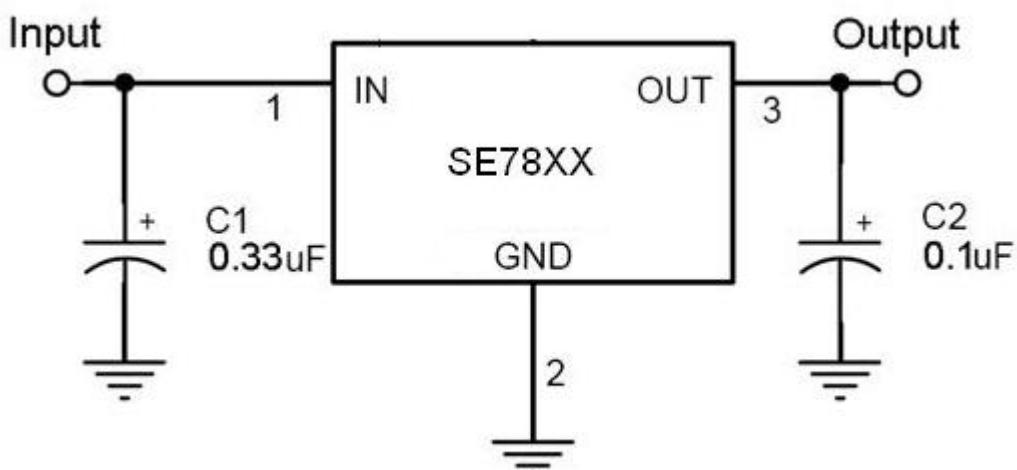

Features

- Output Current up to 1A
- Fixed Output Voltages of 5V, 9V and 12V
- Output Voltage Accuracy of $\pm 4\%$ over the Full Temperature Range
- Internal Short Circuit Current Limiting
- Internal Thermal Overload Protection
- Output Transistor Safe-area Protection
- Low Load Regulation
- Stable Performance in High Temperature

Applications

- Intelligent Ammeter
- Power Management for Computer Mother Board
- LCD Monitor and LCD TV
- Post Regulators for Switching Supplies
