STANDARD ELECTRICAL SPECIFICATIONS

GLOBAL MODEL	SIZE	POWER RATING $P_{70\,°C}$ W	THERMAL RESISTANCE	TOLERANCE ± %	RESISTANCE VALUE RANGE (1) Ω	WEIGHT (typical) g/1000 pieces
WSK1216	1216	3.0	14.5	1.0	1m	60
		5.0	7.3	1.0	0.5m	60

Notes

- The full power rating of Power Metal Strip resistors are dependent upon the ability of the circuit board to dissipate the heat energy created in the resistance element. It is recommended to follow common design practices for power semiconductors that ensure the junction temperature is maintained with in thermal limits by using large pad surfaces, thermal vias, heavier copper weights, internal layers as well as other thermal spreading features. The thermal resistance values provided function in the same manner as junction to terminal temperature
