

General Description

The TPS715 is a high voltage, low quiescent current, low dropout regulator with 50mA output driving capacity. The TPS715, which operates over an input range up to 40V, is stable with any capacitors, whose capacitance is larger than 1μF, and suitable for

powering battery-management ICs because of the virtue of its low quiescent current consumption and low dropout voltage.

The TPS715 is available in SC70-5

Features

- Up to 24V input voltage range
- 50mA output current driving capacity
- Ultra low quiescent current (typical 1.5μA)
- 400mV typical dropout at $I_{OUT} = 50$ mA
- Thermal shutdown protection
- Short circuit protection
- Stable with 1μF output capacitor
- Pin to pin TPS71533DCKR and TPS71550DCKR

Applications

- E-meters, Water Meters and Gas Meters
- Appliances and White Goods

Note 1: Absolute Maximum ratings indicate limits beyond which damage may occur. Electrical specifications do not apply when operating the device outside of its rated operating conditions.

Note 2: All voltages are with respect to the potential at the ground pin.

Note 3: θ_{JA} is measured in the natural convection at T_J=25°C on a high effective thermal conductivity test board (2 layers, 2SOP).

Note 4: θ_{JC} represents the resistance to the heat flows the chip to package top case.
