**DUAL JK POSITIVE EDGE-TRIGGERED FLIP-FLOP**

**General Description**

The F109 consists of two high-speed, completely independent transition clocked JK flip-flops. The clocking operation is independent of rise and fall times of the clock waveform. The JK design allows operation as a D flip-flop (refer to F74 data sheet) by connecting the J and K inputs.

**Asynchronous Inputs:**

- LOW input to  $\overline{SD}$  sets Q to HIGH level
- LOW input to  $\overline{CD}$  sets Q to LOW level
- Clear and Set are independent of clock
- Simultaneous LOW on  $\overline{CD}$  and  $\overline{SD}$  makes both Q and  $\overline{Q}$  HIGH
