

SN55ALS056, SN55ALS057, SN75ALS056, SN75ALS057 TRAPEZOIDAL-WAVEFORM INTERFACE BUS TRANSCEIVERS

SLLS028E – AUGUST 1987 – REVISED MAY 1995

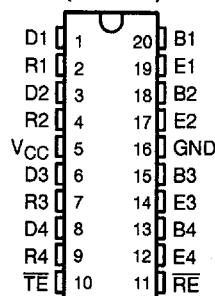

SUITABLE FOR IEEE STANDARD 896 APPLICATIONS[†]

- SN55ALS056 and SN75ALS056 are Octal Transceivers
- SN55ALS057 and SN75ALS057 are Quad Transceivers
- High-Speed Advanced Low-Power Schottky (ALS) Circuitry
- Low Power Dissipation:
SN55[†] Devices . . . 60 mW/Channel Max
SN75[†] Devices . . . 52.5 mW/Channel Max
- High-Impedance pnp Inputs
- Logic-Level 1-V Bus Swing Reduces Power Consumption
- Trapezoidal Bus Output Waveform Reduces Noise Coupling to Adjacent Lines
- Power-Up/Power-Down Protection (Glitch Free)
- Open-Collector Driver Outputs Allow Wired-OR Connections
- Designed to Be a Faster, Lower-Power Functional Equivalent of National DS3896, DS3897

[†]The transceivers are suitable for IEEE Standard 896 applications to the extent of the operating conditions and characteristics specified in this data sheet. Certain limits contained in the IEEE specification are not met or cannot be tested over the entire military temperature range.

PRODUCTION DATA Information is current as of publication date.
Products conform to specifications per the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

SN55ALS056, SN55ALS057, SN75ALS056, SN75ALS057 TRAPEZOIDAL-WAVEFORM INTERFACE BUS TRANSCEIVERS

SLLS028E – AUGUST 1987 – REVISED MAY 1995

description

The SN55ALS056 and SN75ALS056 are 8-channel, monolithic, high-speed, advanced low-power Schottky (ALS) devices designed for 2-way data communication in a densely populated backplane. The SN55ALS057 and SN75ALS057 are 4-channel versions with independent driver-input (Dn) and receiver-output (Rn) pins and a separate driver disable for each driver (En).

These transceivers feature open-collector driver outputs with series Schottky diodes to reduce capacitive loading to the bus. By using a 2-V pullup termination on the bus, the output signal swing is approximately 1 V, which reduces the power necessary to drive the bus load capacitance. The driver outputs generate trapezoidal waveforms that reduce crosstalk between channels. The drivers are capable of driving an equivalent dc load as low as $18.5\ \Omega$. The receivers have internal low-pass filters to further improve noise immunity.

The SN55ALS056 and SN55ALS057 are characterized over the full military operating range of -55°C to 125°C . The SN75ALS056 and SN75ALS057 are characterized for operation from 0°C to 70°C .

SLLS028E – AUGUST 1987 – REVISED MAY 1995

Function Tables

'ALS056
TRANSMIT/RECEIVE

| CONTROLS | | CHANNELS |
|----------|-----|-----------|
| CS | T/R | A ↔ B |
| L | H | T (A → B) |
| L | L | R (B → A) |
| H | X | D |

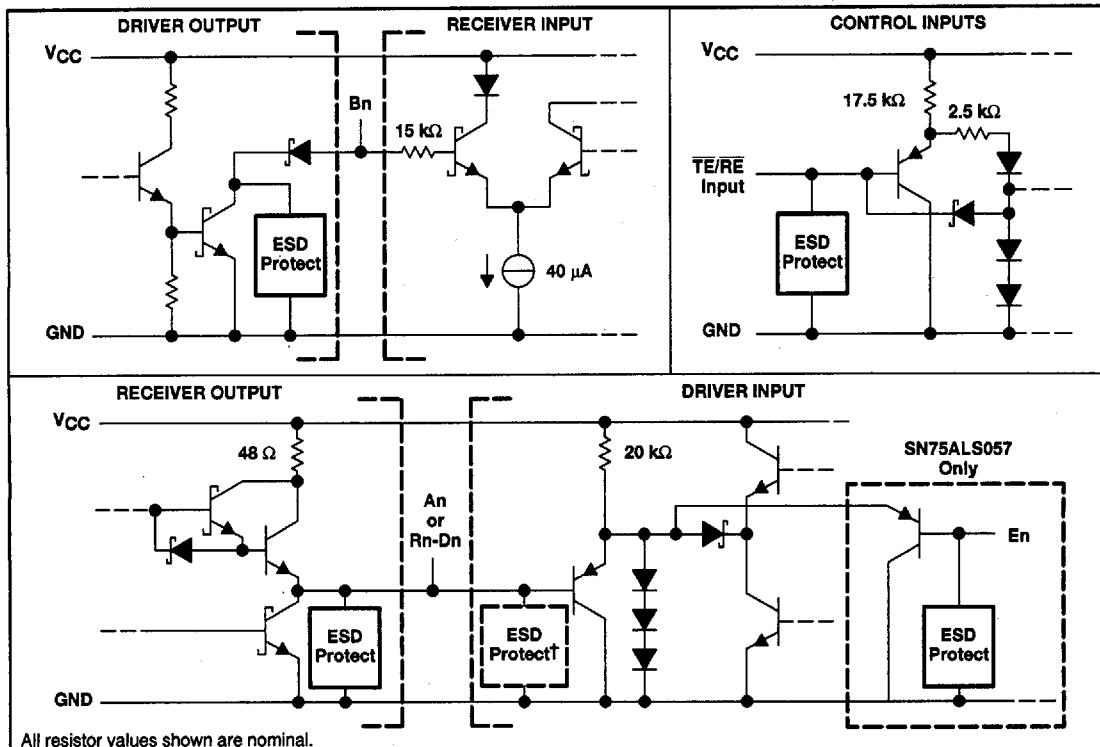

'ALS057
TRANSMIT/RECEIVE

| CONTROLS | | | CHANNELS |
|----------|----|----|------------------|
| TE | RE | En | D → B B → R |
| L | L | L | D R |
| L | L | H | T R |
| L | H | L | D D |
| L | H | H | T D |
| H | L | X | D R |
| H | H | X | D D |

H = high level, L = low level, R = receive, T = transmit, D = disable, X = irrelevant

Direction of data transmission is from An to Bn for the 'ALS056 and from Dn to Bn for the 'ALS057. Direction of data reception is from Bn to An for the 'ALS056 and from Bn to Rn for the 'ALS057. Data transfer is inverting in both directions.

schematics of inputs and outputs

† Additional ESD protection is on the 'ALS057, which has separate receiver-output and driver-input pins.
