

54F/74F169

4-Stage Synchronous Bidirectional Counter

General Description

The 'F169 is a fully synchronous 4-stage up/down counter. The 'F169 is a modulo-16 binary counter. Features a preset capability for programmable operation, carry lookahead for easy cascading and a U/D input to control the direction of counting. All state changes, whether in counting or parallel loading, are initiated by the LOW-to-HIGH transition of the clock.

Features

- Asynchronous counting and loading
- Built-in lookahead carry capability
- Presettable for programmable operation

Ordering Code: See Section 11

Commercial	Military	Package Number	Package Description
74F169PC		N16E	16-Lead (0.300" Wide) Molded Dual-In-Line
	54F169DM (Note 2)	J16A	16-Lead Ceramic Dual-In-Line
74F169SC (Note 1)		M16A	16-Lead (0.150" Wide) Molded Small Outline, JEDEC
74F169SJ (Note 1)		M16D	16-Lead (0.300" Wide) Molded Small Outline, EIAJ

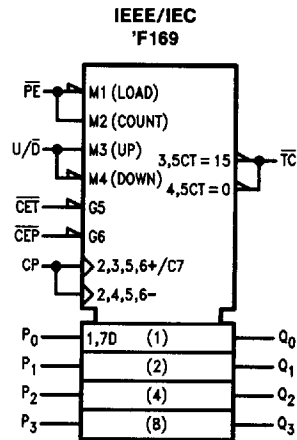

Note 1: Devices also available in 13" reel. Use suffix = SCX and SJX.

Note 2: Military grade device with environmental and burn-in processing. Use suffix = DMQB.

Pin Names	Description	54F/74F	
		U.L. HIGH/LOW	Input I _{IH} /I _{IL} Output I _{OH} /I _{OL}
CEP	Count Enable Parallel Input (Active LOW)	1.0/1.0	20 μA / -0.6 mA
CET	Count Enable Trickle Input (Active LOW)	1.0/2.0	20 μA / -1.2 mA
CP	Clock Pulse Input (Active Rising Edge)	1.0/1.0	20 μA / -0.6 mA
P ₀ -P ₃	Parallel Data Inputs	1.0/1.0	20 μA / -0.6 mA
PE	Parallel Enable Input (Active LOW)	1.0/1.0	20 μA / -0.6 mA
U/D	Up-Down Count Control Input	1.0/1.0	20 μA / -0.6 mA
Q ₀ -Q ₃	Flip-Flop Outputs	50/33.3	-1 mA / 20 mA
TC	Terminal Count Output (Active LOW)	50/33.3	-1 mA / 20 mA

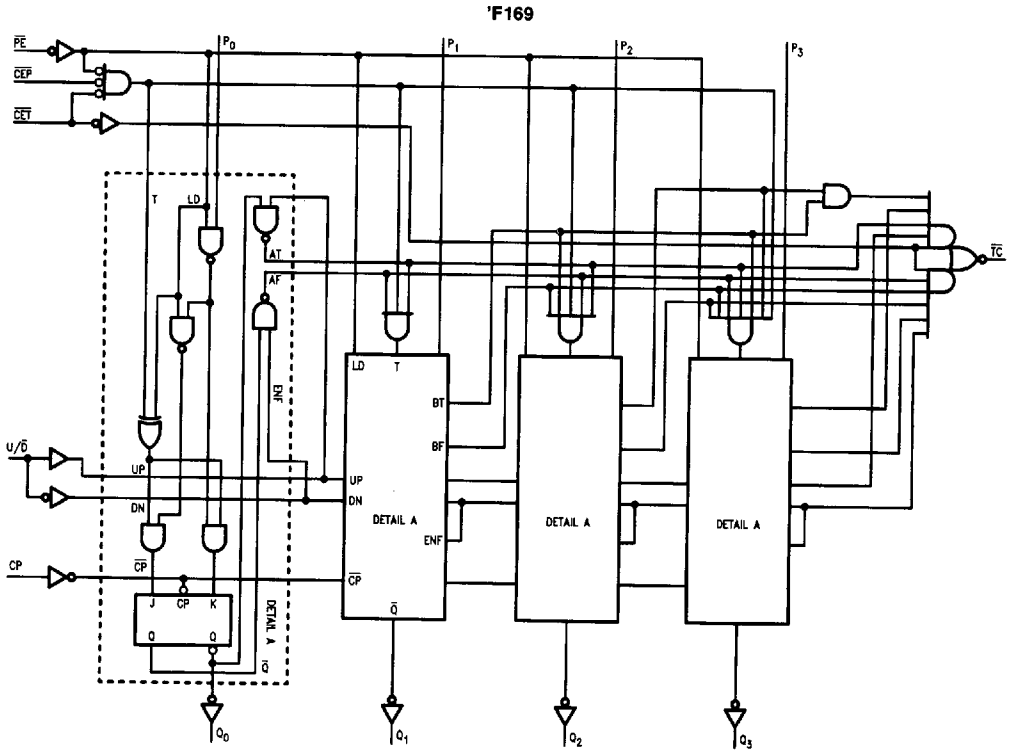

Functional Description

The 'F169 uses edge-triggered J-K type flip-flops and has no constraints on changing the control or data input signals in either state of the clock. The only requirement is that the various inputs attain the desired state at least a setup time before the rising edge of the clock and remain valid for the recommended hold time thereafter. The parallel load operation takes precedence over other operations, as indicated in the Mode Select Table. When PE is LOW, the data on the P₀-P₃ inputs enters the flip-flops on the next rising edge of the clock. In order for counting to occur, both CEP and CET must be LOW and PE must be HIGH; the U/D input then determines the direction of counting. The Terminal Count (TC) output is normally HIGH and goes LOW, provided that

CET is LOW, when a counter reaches zero in the Count Down mode or reaches 15 for the 'F169 in the Count Up mode. The TC output state is not a function of the Count Enable Parallel (CEP) input level. Since the TC signal is derived by decoding the flip-flop states, there exists the possibility of decoding spikes on TC. For this reason the use of TC as a clock signal is not recommended (see logic equations below).

- 1) Count Enable = CEP • CET • PE
- 2) Up: ('F169): TC = Q₀ • Q₁ • Q₂ • Q₃ • (Up) • CET
- 3) Down: TC = Q₀ • Q₁ • Q₂ • Q₃ • (Down) • CET

Logic Diagram

Please note that these diagrams are provided only for the understanding of logic operations and should not be used to estimate propagation delays.

Absolute Maximum Ratings (Note 1)

If Military/Aerospace specified devices are required, please contact the National Semiconductor Sales Office/Distributors for availability and specifications.

Storage Temperature	-65°C to +150°C
Ambient Temperature under Bias	-55°C to +125°C
Junction Temperature under Bias	-55°C to +175°C
Plastic	-55°C to +150°C
V _{CC} Pin Potential to Ground Pin	-0.5V to +7.0V
Input Voltage (Note 2)	-0.5V to +7.0V
Input Current (Note 2)	-30 mA to +5.0 mA
Voltage Applied to Output in HIGH State (with V _{CC} = 0V)	
Standard Output	-0.5V to V _{CC}
TRI-STATE® Output	-0.5V to +5.5V

Current Applied to Output in LOW State (Max) twice the rated I_{OL} (mA)

Note 1: Absolute maximum ratings are values beyond which the device may be damaged or have its useful life impaired. Functional operation under these conditions is not implied.

Note 2: Either voltage limit or current limit is sufficient to protect inputs.

Recommended Operating Conditions

Free Air Ambient Temperature	
Military	-55°C to +125°C
Commercial	0°C to +70°C
Supply Voltage	
Military	+4.5V to +5.5V
Commercial	+4.5V to +5.5V
