

## MT-FEP

# FEP Heat Shrink Tubing

### Applications

- Process aid for reflowing catheter shafts
- Process aid for joint bonding

### PROFILE

- Shrink ratio  $\leq 1.6:1$
- Full recovery at 210°C (410°F) minimum
- Tight longitudinal change control as low as  $\pm 2\%$
- Manufactured to ISO 10993 standards
- Custom sizing, finishing options available
- Translucent for high optical clarity
- Color blending option available

### ABOUT

- MT-FEP is a fluorinated ethylene propylene (FEP) heat shrink tubing. FEP offers excellent consistency, high dielectric strength and is chemically inert. MT-FEP is lubricious and semi-rigid with shrink ratios up to 2:1\*. FEP is the industry gold standard for reflowing catheter shafts and bonding joints.
- For our MT-FEP, we can control longitudinal growth  $\pm 2\%$  ensuring consistency on lot-to-lot, reducing waste and cost.

*\*Upper limit on select applications. Optimal shrink ratio is 1.6:1*
