

# M Series Connectors ratchet coupling

 **LEMO**®

## Precision modular connectors to suit your application

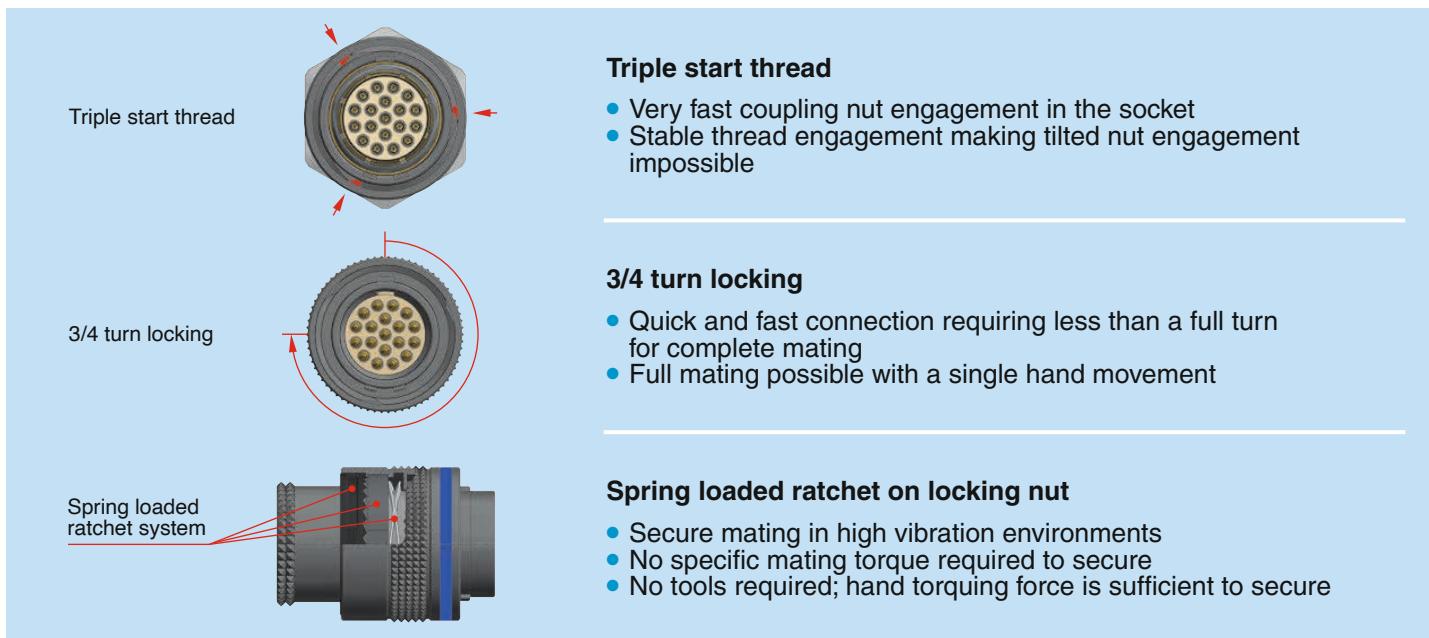

Since its creation in Switzerland in 1946 the LEMO Group has been recognized as a global leader of circular Push-Pull connectors and interconnect solutions. Today LEMO and its affiliated companies, REDEL and COELVER, are active in more than 80 countries with the help of over 40 subsidiaries and distributors.

### Over 90000 connectors

The modular design of the LEMO range provides over 90000 connectors from miniature ø 3 mm to ø 50 mm, capable of handling cable diameters up to 30 mm and for up to 114 contacts. This vast portfolio enables you to select the ideal connector configuration to suit almost any specific requirement in most markets, including medical devices, test and measurement instruments, machinery, audio video broadcast, telecommunications and military.

### LEMO's ratchet 3/4 turn connection system

This highly robust 3/4 turn screw locking system is recognized worldwide for the most demanding applications as a safe, secure and quick screw mating system. Its special ratchet mechanisms provides ultra high reliability in the most severe vibrations environments, shocks or pull on the cables.

### UL Recognition

LEMO connectors are components recognized by the Underwriters Laboratories (UL), facilitating the UL approval of the complete system (including LEMO connector, cable and your equipment).

### CE marking

CE marking  means that the appliance or equipment complies with the protection requirements of one or several European safety directives. CE marking  applies to complete products or equipment, **but not to electromechanical components, such as connectors**.

### REACH and RoHS

LEMO connector specifications comply with the requirements of the RoHS directive (2011/65/EU) and REACH regulation (1907/2006/EU) of the European Parliament and latest amendments. These REACH and ROHS regulations specify the restrictions of the use of hazardous substances in LEMO products marketed in Europe.

### Product safety notice & disclaimers

Please read and follow all instructions specified on the last page or on our [website](#) carefully and consult all relevant national and international safety regulations for your application. Improper handling, cable assembly, or wrong use of connectors can result in hazardous situations.

LEMO products and services are provided "as is." LEMO makes no warranties or representations with regard to LEMO product & services or use of them, express, implied or statutory, including for accuracy, completeness, or security.

In no event shall LEMO be liable for any direct, indirect, punitive, incidental, special consequential damages, to property or life, whatsoever arising out of or connected with the use or misuse of LEMO's products.

## Introduction

This catalogue provides a complete description of the LEMO M series portfolio. M series connectors are lightweight triple-start ratchet coupling type connectors designed for avionics, military, security, motorsport and heavy duty applications. The M series is a COTS (Commercial Off-The-Shelf) product, that fulfills the harshest MIL-DTL-38999 requirements in a more compact and lightweight package. It features a very wide range of configurable options to fulfill every applications. The LEMO engagement for supplying innovative solutions which meets users highest expectations translates thought the M series in a highly reliable interconnect solution that helps our customers reduce their maintenance and downtime in critical applications.

The LEMO quality arises from years of expertise in design, manufacturing and quality system where all single M series connectors get identified with a laser engraved part number and production batch number for full traceability from raw materials to fully assembled product.

## Technical characteristics

### Materials and treatments

Component	Shell material code <sup>1)</sup>				Material (Standard)	Surface treatment ( $\mu\text{m}$ )		
	X	C	L	I		chrome	nickel	gold
Outer shell, conical nut, coupling nut	● <sup>2)</sup>				Aluminium alloy (AA 6262A or AA 6023)	–	5	–
		●			Brass (UNS C 38500)	0.3	–	–
			●		Aluminium alloy (AA 6262A or AA 6023)	anodized		
				● <sup>2)</sup>	Aluminium alloy (AA 6262A or AA 6023)	–	14	–
Earthing crown		●			Bronze (UNS C 54400) or special brass	–	–	1.5
Hexagonal nut		●			Brass (UNS C 38500)	–	3	–
	●		●	●	Aluminium alloy (AA 6262A or AA 6023)	–	5	–
Male crimp contact		●			Brass (UNS C 34500)	–	–	1.0
Female crimp contact		●			Bronze (UNS C 54400)	–	–	1.5
Clips		●			Cu-Be or special steel	without treatment		
Insulator		●			PEEK			
Ratchet		●			Special PEEK			
O-ring	●		●	●	FPM/FKM (Viton®)			
	●	●			EPDM (HY●)			
		●			Silicone			
Sealing resin	●	●	○		Epoxy (Araldite®) (HE●)			
	●	●			Silicone (Elastosil®) (HY●)			
Cable rear seal		●			Fluorosilicone			
Spring		●			Stainless steel			

**Note:** standards for surface treatment are as follows: chrome-plated SAE AMS 2460; nickel-plated SAE AMS QQ N 290 or MIL DTL 32119; gold-plated ISO 27874.

<sup>1)</sup> X = Nickel-plated aluminium alloy (standard).

C = Chrome-plated brass.

L = Anodized aluminium.

I = NiCorAl™ Nickel fluorocarbon polymer aluminium alloy.

<sup>2)</sup> anthracite colour.

● First choice alternative ○ Special order alternative

### Electrical performance

Characteristics	Value	IEC international	MIL-spec tests
Insulation resist. (at ambient temp.) <sup>1)</sup>	> 10 <sup>12</sup> $\Omega$ , > 10 <sup>10</sup> $\Omega$ (after humidity)	IEC 60512-2 test 3a	EIA-364-21
Dielectric withstand volt. (sea level)	See table pages 23 to 28	IEC 60512-2 test 4a	EIA-364-20
Contact resistance <sup>3)</sup>	See table below	IEC 60512-2 test 2a	EIA-364-06
Current rating	See insulator configuration pages 23 to 28	IEC 60512-3 test 5a	
Shell to shell conductivity <sup>2)</sup>	< 1.5m $\Omega$	IEC 60512-2-6	EIA-364-83
Shielding effectiveness, low frequency <sup>2)</sup>	≥ 80 dB up to 1GHz		EIA-364-66
Shielding effectiveness, high frequency <sup>2)</sup>	≥ 70 dB (3GHz), ≥ 58 dB (6GHz), ≥ 40 dB (10GHz)		EIA-364-66

Contact resistance <sup>3)</sup> IEC 60512-2 test 2a								Value
0.5	0.7	0.9	1.3	4.0	5.0	6.0	8.0	$\varnothing$ A (mm)
≤ 8.3	≤ 5.7	≤ 4.2	≤ 2.9	≤ 0.3	≤ 0.25	≤ 0.2	≤ 0.2	m $\Omega$

**Note:** 1) after humidity test: 21 days at 95% RH according to IEC 60068-2. Insulation resistance measured between the contacts and contact/shell.

2) no shell to shell conductivity for anodized aluminium versions (shielding and conductivity values do not apply).

3) after 3000 mating cycles and the salt spray test according to IEC 60512-6 test 11 f.

## Mechanical performance

Characteristics	Value	IEC international	MIL-spec tests
Endurance	3000 cycles	IEC 60512-5 test 9a	EIA-364-09
Gunfire vibration	25 to 2000 Hz, 3 axis (Apache helicopter)		MIL-STD-810F method 519.5
Vibration-Sine <sup>1) 2)</sup>	30 g, 3 axis, 12 hr		MIL-STD-202 method 204-G
Vibration-Random <sup>2)</sup>	50-2000 Hz, 37.8 g rms-3 axes; 4h amb	IEC 60512-6-4	EIA-364-28 test cond. V letter I
Shock <sup>2)</sup>	300 g - 3 msec	IEC 60512-6-3	EIA-364-27 condition D
Acceleration	50 g acceleration		MIL-STD-1344 - 2011-1, A
Torque	See table below		

**Note:**

<sup>1)</sup> amplitude: 30g. Frequency: 10 to 2000 Hz. Time per axis: 4 hours (X, Y, Z).

<sup>2)</sup> no signal discontinuity above 1 µs.

## Plug mating/unmating torque

Series	Coupling torque tightning (N.cm)	Coupling torque untightning (N.cm)	Series	Coupling torque tightning (N.cm)	Coupling torque untightning (N.cm)
MM	8	4	TM	26	30
0M	4	5	4M	26	25
1M	10	11	LM	48	43
2M	20	14	5M	91	54
3M	34	29			

**Note:** indicative values, tightening torque may vary depending on insert configuration.

## Environmental performance

Characteristics	Value	IEC international	MIL-spec tests
Standard models operating temperature (mated)	-55°C/+200°C (shell material code C + Silicone O-ring) -20°C/+200°C (shell material code I/X + FPM O-ring)		
Ingress protection index (mated)	IP68 (at 2 m, 15Hr)	IEC 60529	
Fungus	Satisfied - by material analysis		MIL-STD 810F-508.5
Flammability	60 sec. front and back face		EIA-364-104A
Fluid contamination <sup>1)</sup>	Fuels, gasoline, hydraulic oils, solvents, de-icing		MIL-STD-810F method 504
Sand and dust <sup>2)</sup>	6 hr, 55°C, blowing < 150 µm dust		MIL-STD 810F-510.4
Lightning strike	10 K amps - 6 times		EIA-364-75
Altitude-low temp <sup>3)</sup>	-65°C; 40'000 feet and 400 VAC		EIA-364-105A
Salt fog <sup>4)</sup>	48 hours (shell material code X/L)	IEC 60512-6 test 11f	EIA-364-26
	500 hours (shell material code I)	IEC 60512-6 test 11f	EIA-364-26
	> 1000 hours (shell material code C)	IEC 60512-6 test 11f	EIA-364-26
Thermal shock (standard models)	5 cycles: -65°C to +150°C	IEC 60512-11-4	EIA-364-32 test condition IV
Altitude immersion	No moisture on contacts		EIA-364-03
Humidity	21 days at 95%	IEC 60068-2	EIA-364-31 method IV
Safety	IP2X finger protection for high power connectors	IEC 60529	

**Note:**

<sup>1)</sup> connectors immersed at both 70°C and 25°C according to specification. Connectors are then inspected, no visual signs of damage seen.  
Fuels: Kerosene, JP4, (Nato F40) at 70°C +/- 2°C. Gasoline: ASTM 4814. Hydraulic oils: Mineral oil based MIL-H-5606.

Solvents: Isopropanol. De-icing fluids: 25% ethylene glycol.

<sup>2)</sup> no signs of damage, connectors opened and closed without difficulty. Dust or sand was not inside connector.

<sup>3)</sup> wired mated connectors = no voltage breakdown, shell to all contacts (connected together) w/400 VAC after 1 hour at -65° C at 40'000 feet altitude.

<sup>4)</sup> corrosion resistance. Inspection: salt deposits shall be removed by gentle wash in running water with light brushing using soft brush.

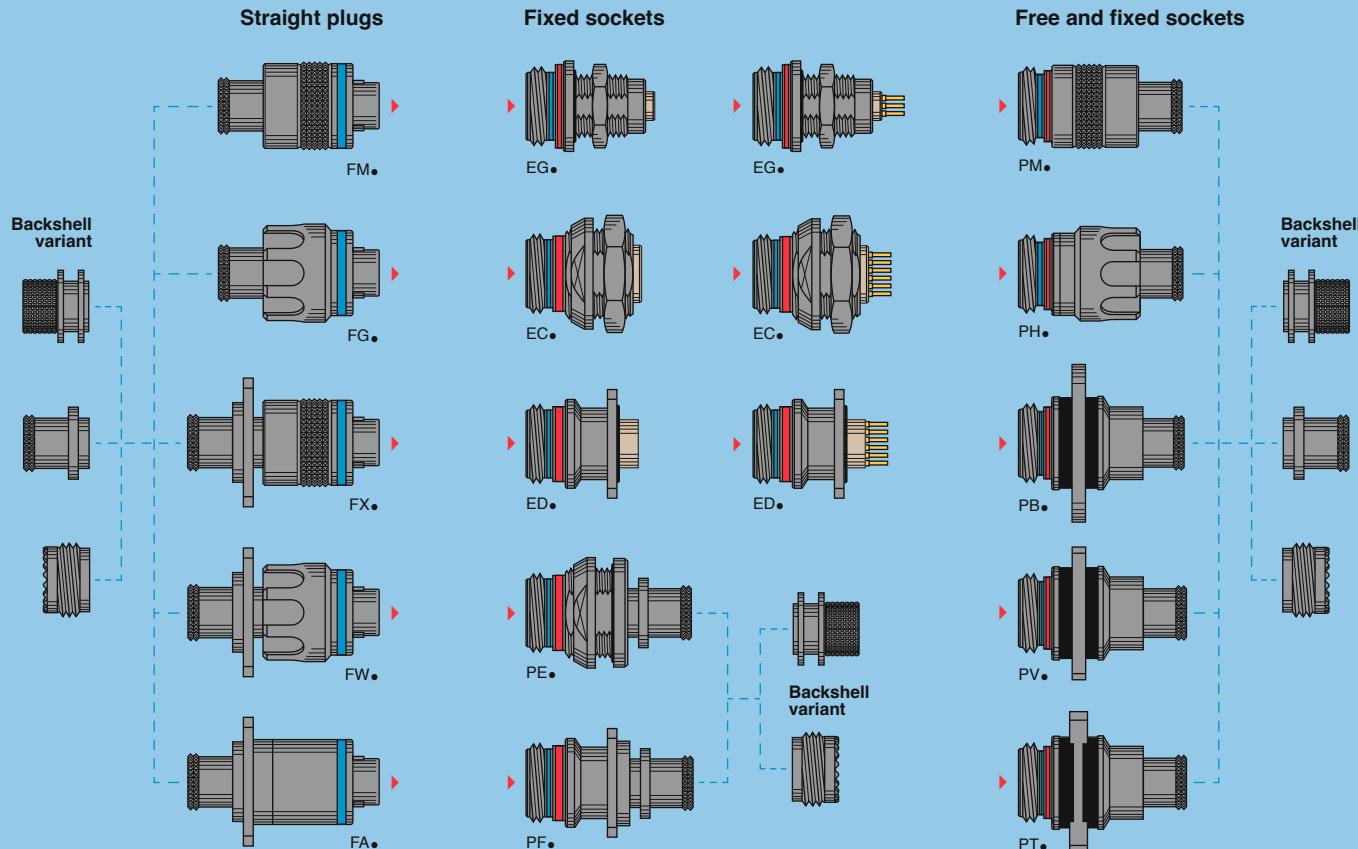

# M series

The M Series connector offer a new innovative design for avionics, military, security, motorsport and heavy duty applications. When selected in one of the high-strength aluminium options, this connector is one of the lightest and most compact of the LEMO product line. A one-grip ratchet locking system enables quick and secure coupling of the connectors. The arctic grip makes it easy to manipulate the connector while wearing gloves or when the connector is located in a difficult to access area.

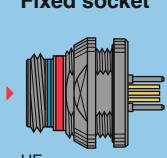

## Features:

- Ratchet-coupling mechanism (less than 3/4 turn to seat)
- Compact design for space savings
- Oil and fuel resistant
- 360° screening for full EMC shielding
- Colour coding / keying
- Scoop proof
- Threaded for MIL-DTL-38999M (series III) backshell
- Lightweight
- High vibration and shock resistance
- Sealed to IP68 when mated
- Standard or reverse gender configuration available
- Pin configuration from 2 to 114 contacts

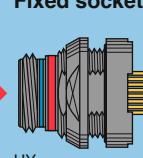

## Standard models (page 7)

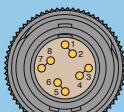

## Watertight model (page 13)

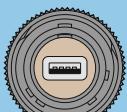

## Vacuumtight model (page 14)

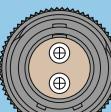

## High Speed models (page 15)

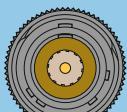

## USB 2.0 models (page 17)

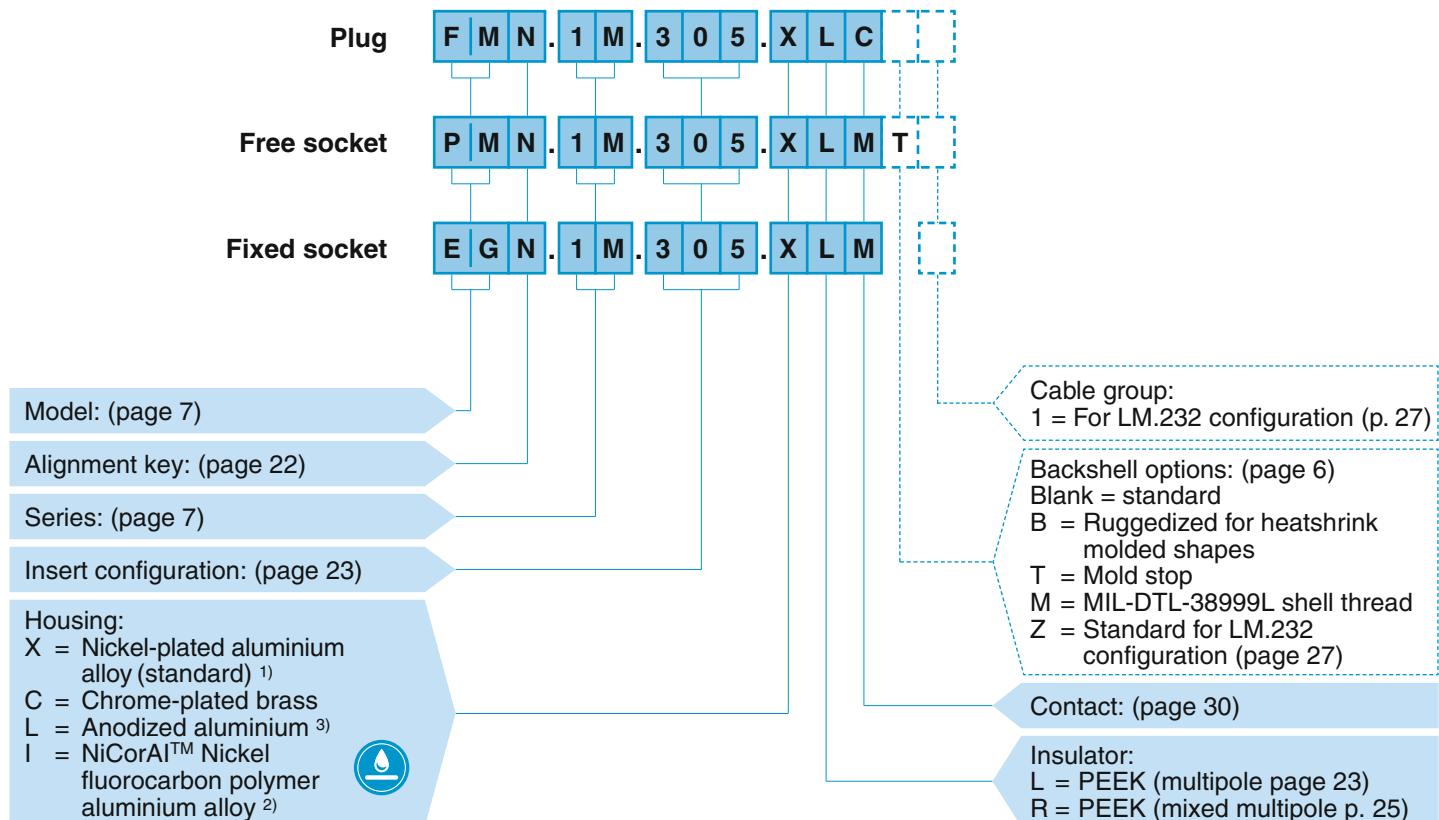

## Fibre Optic models (page 18)

## High Power models (page 20)

## Standard models part numbering system

**FMN.1M.305.XLC** = straight plug with key (N), knurled grip, 1M series, multipole type with 5 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, male crimp contacts.

**PMN.1M.305.XLMT** = free socket with key (N), knurled grip, 1M series, multipole type with 5 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, female crimp contacts and mold stop.

**EGN.1M.305.XLM** = fixed socket with key (N), 1M series, multipole type with 5 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, female crimp contact.

**Note:** 1) anthracite colour / 48 hours salt fog resistance.

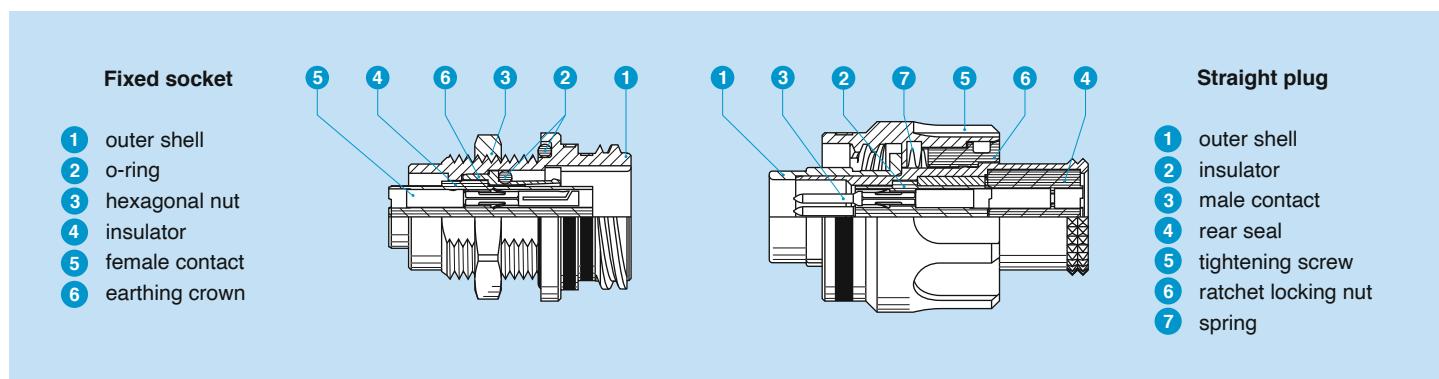

2) anthracite colour / 500 hours salt fog resistance RoHS 2/REACH.

3) these connectors are designed for use with non-shielded cables as anodization is non conductive.

## Others models part numbering system

- **Watertight** (page 13)
- **Vacuumtight** (page 14)
- **High Speed** (page 15)
- **USB 2.0** (page 17)
- **Fibre Optic** (page 18)
- **High Power** (page 20)

## Part section showing internal components

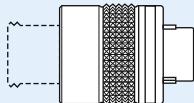

## Locking nuts options

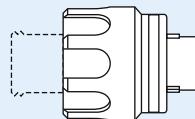

M Series connectors offer 2 different options for coupling nut allowing to adapt ergonomics according to use cases.

- The Knurled grip is the default choice for most applications as it offers a good level of grip whilst keeping a very compact overall plug diameter.
- The Arctic grip offers maximum ergonomics enabling easy manipulation even with gloves.

**Knurled grip (standard)**

**Arctic grip (variant)**

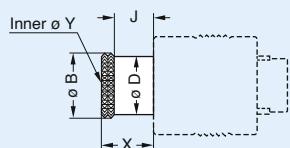

## Backshell options

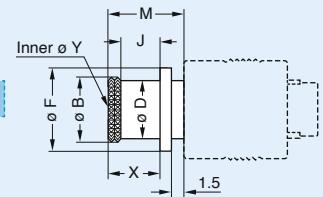

M Series connectors offers 4 different backshell options allowing for various cable assembly attachments.

- The standard backshell offers a simple design allowing to either use a crimp ring or a spring for shielding attachment. This is the default option if no specific termination is specified.
- The Mold stop offers a special geometry enabling over molding termination for a clean and rugged cable assembly finish.
- The Heat shrink molded shape offers the matching geometry to guarantee a perfect fit with heat shrink molded boots (see page 35).
- The MIL-DTL-38999M (series III) offers the matching screw geometry allowing the use of standard D38999 compatible backshells.

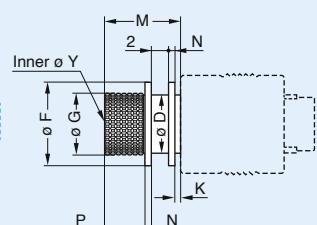

**Standard**

**Mold stop**

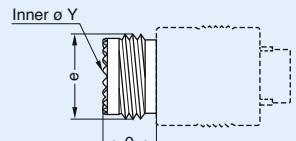

**Heatshrink molded shapes**

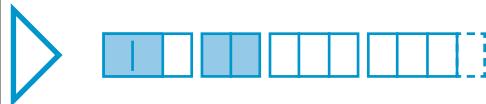

See page 35 for heatshrink boot

**MIL-DTL-38999M (series III)**

### PCB fixation (Detail A)

Panel cut-out (page 41).

PCB drilling pattern (page 44).

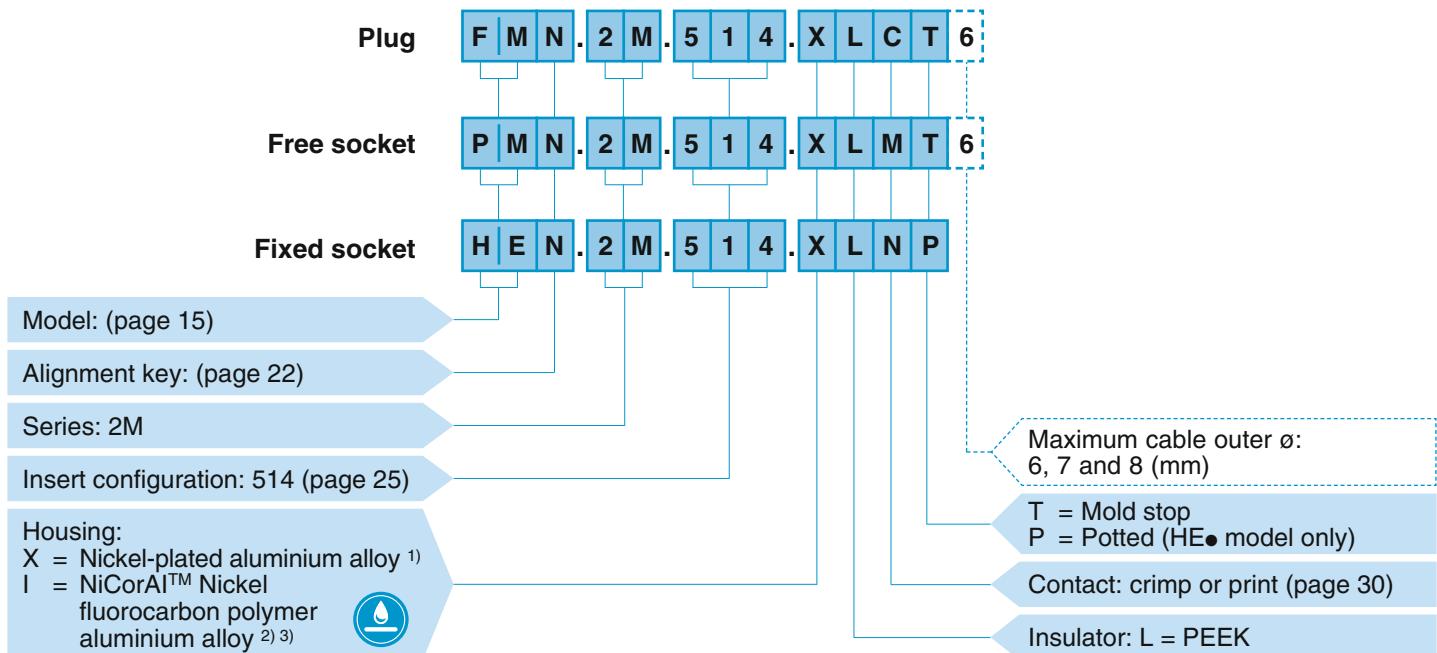

**Note:** special anti-vibration thread to be used with standard metric screws (not supplied).

## High Speed models

Those configurations meet the Ethernet 10Gb/s data transfer requirements (CAT6, up to 250 MHz).

### Part numbering system

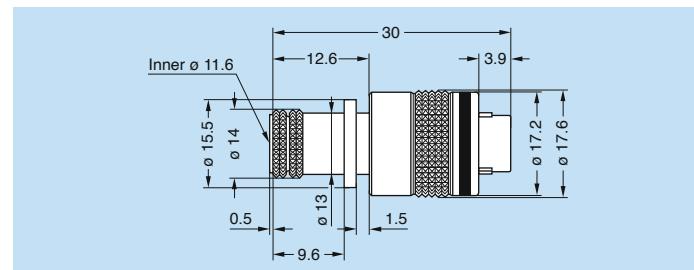

**FMN.2M.514.XLCT6** = straight plug with key (N), knurled grip, 2M series, multipole type with 8 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, male crimp contacts.

**PMN.2M.514.XLMT6** = free socket with key (N), knurled grip, 2M series, multipole type with 8 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, female crimp contacts and mold stop.

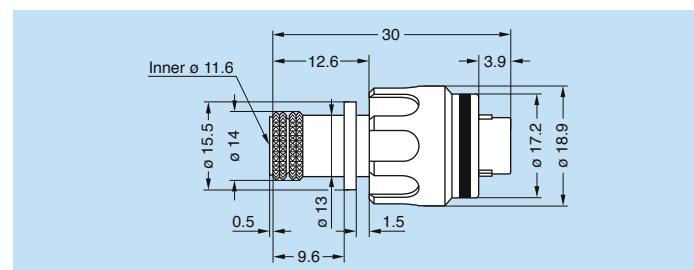

**HEN.2M.514.XLNP** = fixed socket, nut fixing, with key (N), 2M series, multipole type with 8 contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, female print contacts, watertight.

**Note:** 1) anthracite colour / 48 hours salt fog resistance.  
2) anthracite colour / 500 hours salt fog resistance RoHS 2/REACH.  
3) NiCorAl™ nickel plating is not allowed with hermetic models.

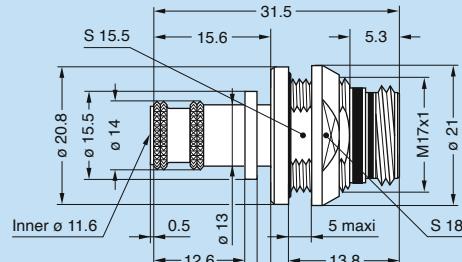

### FM•.2M.514 Straight plug, key (N) or keys (P and U) with knurled grip and mold stop

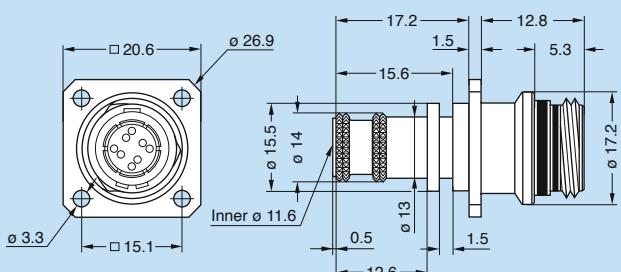

### FG•.2M.514 Straight plug, key (N) or keys (P and U) with arctic grip and mold stop

**PE•2M.514** Fixed socket, key (N) or keys (P and U) with mold stop (back panel mounting)

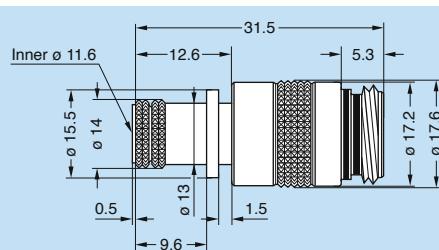

**PF•2M.514 Fixed socket with square flange, key (N) or keys (P and U) with mold stop**

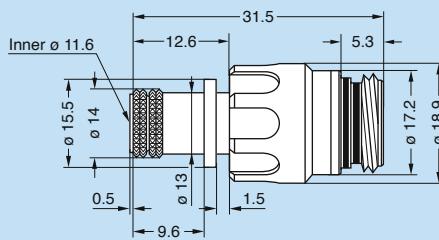

**Note:** (this model is not IP68 due to the absence of panel sealing)

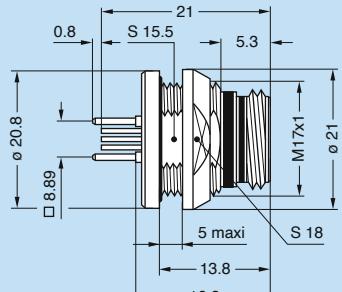

**PM•2.M.514** Free socket, key (N) or keys (P and U) with knurled grip and mold stop

**PHe.2M.514** Free socket, key (N) or keys (P and U) with arctic grip and mold stop

**HE-2M-514** Fixed socket, nut fixing, key (N) or keys (P and U), printed circuit, watertight, (back panel mounting)

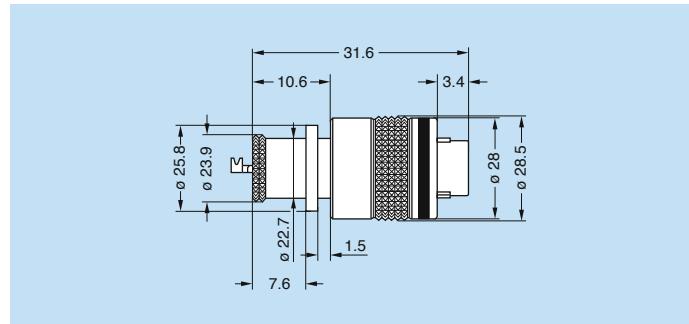

**Note:** see page 41 for panel cut-out and page 42 for PCB drilling pattern. For HE● environmental performance see page 13.

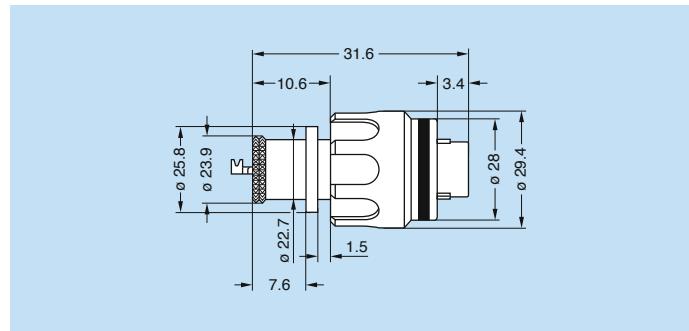

## USB 2.0 models

Those configurations meet the USB 2.0 (480 Mb/s) data transfer requirements using USB Type A inserts.

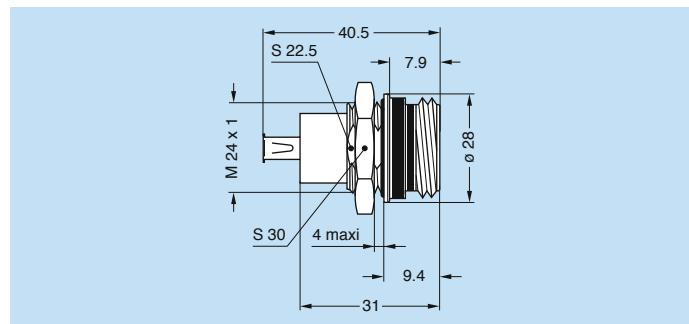

### **FM•.LM.U2A.XPAT** Straight plug, key (W) or keys (R and H) with knurled grip and mold stop

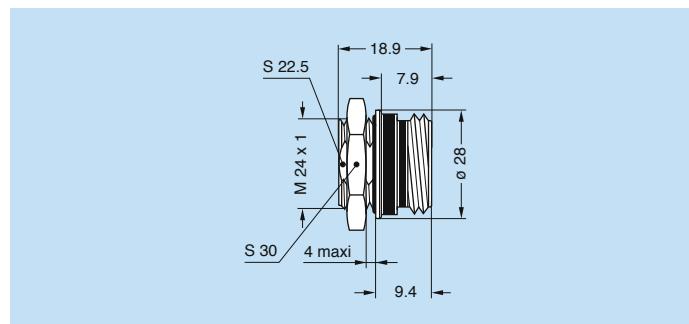

### **FG•.LM.U2A.XPAT** Straight plug, key (W) or keys (R and H) with arctic grip and mold stop

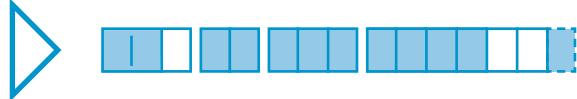

### **EG•.LM.U2A.XPP** Fixed socket, female to female, nut fixing, key (W) or keys (R and H)

### **EG•.LM.U2A.XPL** Fixed socket, nut fixing, key (W) or keys (R and H)

**Note:** see page 41 for panel cut-out.

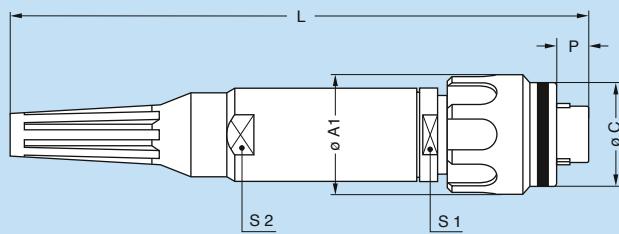

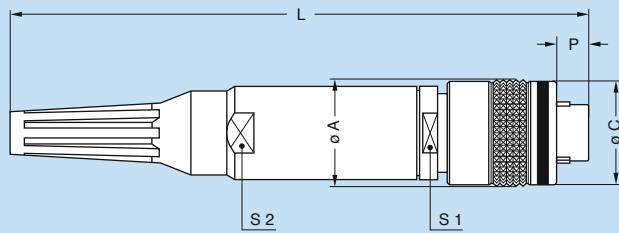

## Fibre Optic models

**Foo** Straight plug (contact to be ordered separately, see page 31)

## High Power models

### Part numbering system

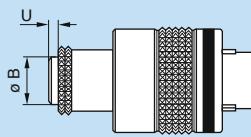

**FGS.3M.H14.XLM** = straight plug with key (S), knurled grip, 3M series, high power contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, female crimp contacts.

**PHS.3M.H14.XLCM** = free socket with key (S), knurled grip, 3M series, high power contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, male crimp contacts, MIL-DTL-38999L shell thread.

**PES.3M.H14.XLCTH** = fixed socket with key (S), 3M series, high power contacts, outer shell in anthracite nickel-plated aluminium alloy, PEEK insulator, male crimp contacts, mold stop, watertight.

**Note:** 1) anthracite colour / 48 hours salt fog resistance. 2) anthracite colour / 500 hours salt fog resistance RoHS 2/REACH.

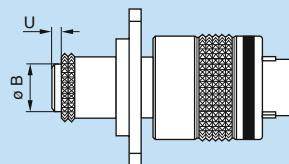

### FM•/FG• Straight plug

Reference	ø B (mm)	Dimensions U (mm)		
		Backshell options		
		Standard	Code B/T	Code M
3M.H14	11.0	5.5	2.5	3.6
TM.H15	12.3	5.5	2.5	4.1
4M.H16	14.0	5.5	2.5	4.1
LM.H18	18.0	10.0	7.0	8.6
5M.H18	22.9	10.0	7.0	8.6
5M.H34/G33	22.9	—	—	—

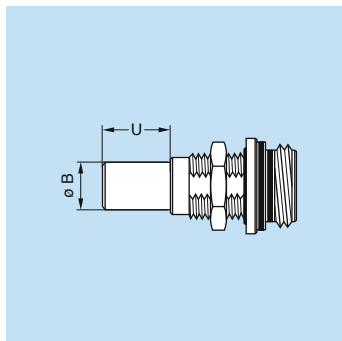

**Note:** all others dimensions can be found on standard models (page 7).

### FX•/FW•/FA• Straight plug with square flange

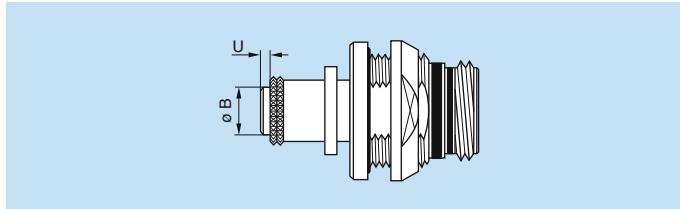

Reference	ø B (mm)	Dimensions U (mm)		
		Backshell options		
		Standard	Code B/T	Code M
3M.H14	11.0	0.5	—	—
TM.H15	12.3	—	—	—

LM.H18	18.0	6.4	5.3	6.4
5M.H18	22.9	6.4	5.3	6.4
5M.H34/G33	22.9	—	—	—

Note: all others dimensions can be found on standard models (p. 12).

**ED• Fixed socket**

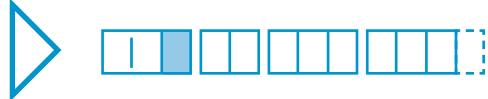

Reference	Dim. (mm)	
	Ø B	U
3M.H14	11.0	14.2
TM.H15	12.3	15.5
4M.H16	14.0	15.5
LM.H18	18.0	20.0
5M.H18	22.9	20.0
5M.H34/G33	22.9	13.0

Note: all others dimensions can be found on standard models (page 10).

**PM•/PH• Free socket**

Reference	Ø B (mm)	Dimensions U (mm)		
		Backshell options		
		Standard	Code B/T	Code M
3M.H14	11.0	2.5	—	0.6
TM.H15	12.3	1.9	0.8	1.9
4M.H16	14.0	1.9	0.8	1.9
LM.H18	18.0	6.4	5.3	6.4
5M.H18	22.9	6.4	5.3	6.4
5M.H34/G33	22.9	—	—	—

Note: all others dimensions can be found on standard models (p. 11).

## Alignment key

### Alignment key and Polarized keying system

M series connector model part numbers are composed of three letters. The LAST LETTER indicates the keys corresponding to a particular contact type.

For example, straight plugs with H, N, P, R, U or W keys, are fitted with male contacts; whereas with S, T, V or X keys, plugs are fitted with female contacts. Sockets with H, N, P, R, U or W keys, are fitted with female contacts; whereas with S, T, V or X keys, sockets are fitted with male contacts.

MM to 3M	Front view of a socket		Model	Colour code	Gender	Contact type		Nb of keys	Angles	
	Plug	Socket				Plug	Socket		$\beta$	$\gamma$
••N	blue	standard	male	female	3	165°	30°	30°	165°	30°
	yellow					150°	60°		150°	60°
	green					130°	100°		130°	100°
	red	reverse	female	male	3	155°	50°	50°	155°	50°
	orange					135°	90°		135°	90°

TM to 5M	Front view of a socket		Model	Colour code	Gender	Contact type		Nb of keys	Angles			
	Plug	Socket				Plug	Socket		$\alpha$	$\beta$	$\gamma$	$\delta$
••W	blue	standard	male	female	5	95°	115°	35°	95°	115°	35°	25°
	yellow					105°	115°		105°	115°	30°	20°
	green					120°	95°		120°	95°	25°	45°
	red	reverse	female	male	5	100°	125°	40°	100°	125°	40°	20°
	orange					110°	120°		110°	120°	35°	25°

### Colour coding

M Series connector attributes a colour code for each alignment key thus allowing for easy identification of matching plugs and sockets within the system.

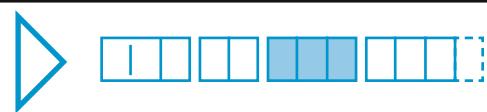

- Standard plated versions only have a light colour ring on the plug nut and socket for identification.
- Anodized aluminum version are proposed with the complete body matching the corresponding colour code/key.

Standard nickel-plated aluminium version

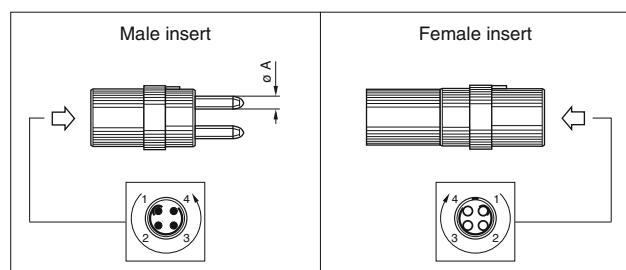

Anodized aluminium version

**Warning:** According to application safety standard, the maximum operating voltage must be determined considering both connector and cable electrical characteristics.

**Note:**

<sup>1)</sup> test voltage according to IEC 60512-2 test 4a; test voltage for connector only. Altitude correction factor is given in IEC 60664-1 table A.2.

<sup>2)</sup> see derating curves for more information.

<sup>3)</sup> the specified rated current can be applied simultaneously to all the contacts. It corresponds to an average temperature rise of 40°C of the connector (measured according to IEC 60512-3 test 5a).

<sup>4)</sup> rated current per contact (on all contact) simultaneously.

<sup>5)</sup> sequential connection: first mate/last break High Power contacts.

<sup>6)</sup> see LV contacts dimensions on page 30.

Both plugs and sockets provide IP2X finger protection to comply with the IEC61032 standard.

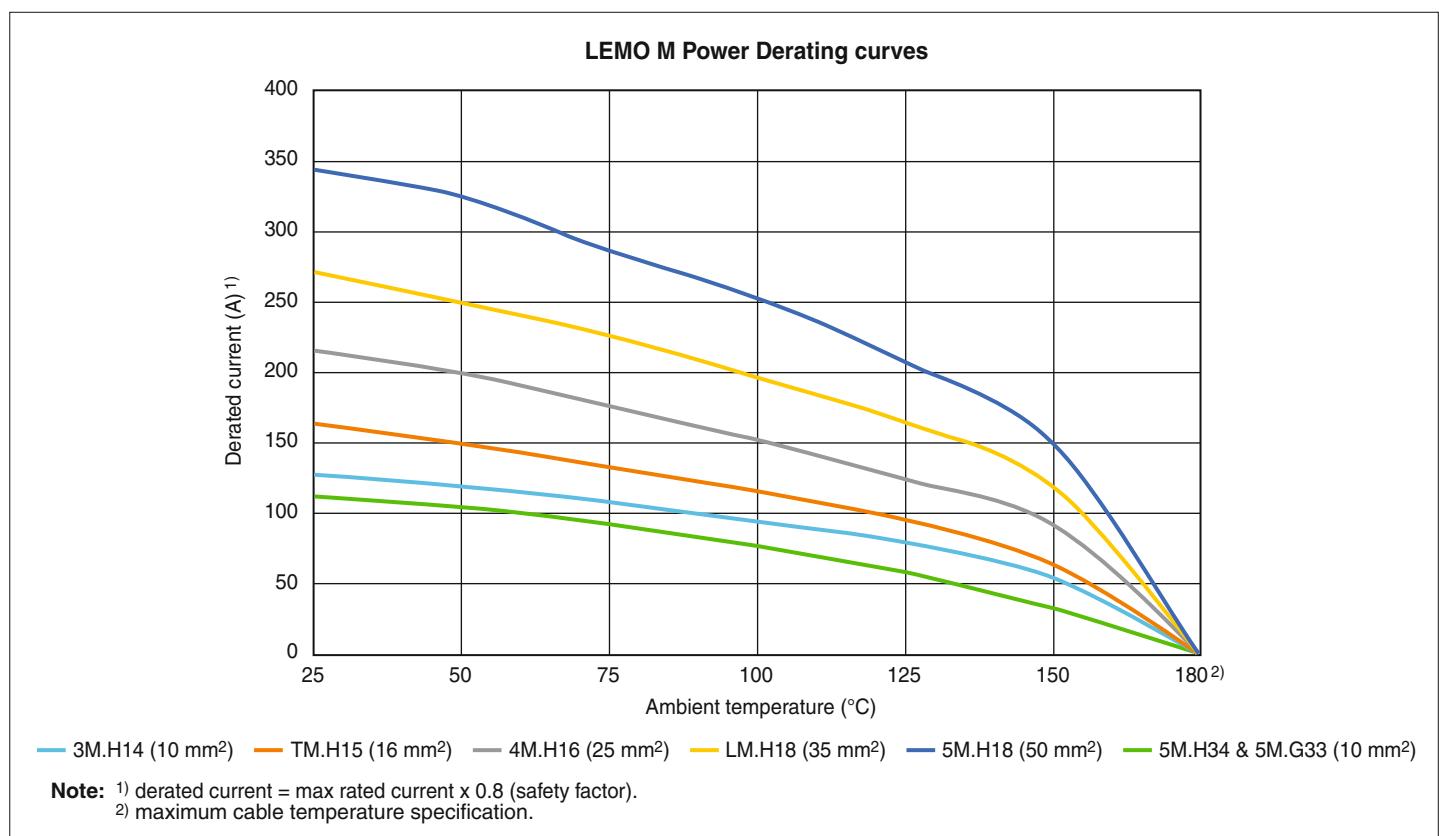

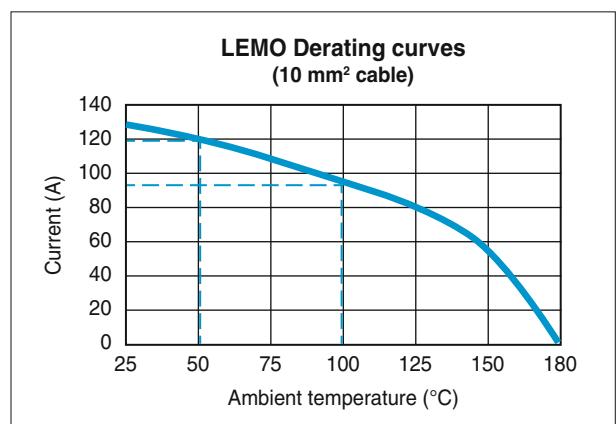

## Derating curves

The derating curve is a current-carrying capacity curve showing which currents may flow continuously via the connector subject to various ambient temperatures. It includes a safety factor (0.8) to protect from spikes and factor uncertainties in temperature measurement.

For example, ambient temperature for connectors on e-Formula 1 batteries is around 50°C. At that temperature, the current that can go through a 10 mm<sup>2</sup> cable is 120A; it is 130A at 25°C and goes down to 95A at 100°C (see chart on the side).

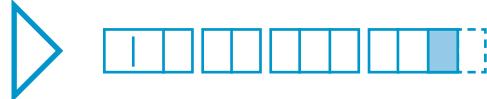

It's therefore important to always clarify the ambient operating temperature & required current to select the right high-power connector. Note that the limiting factor is often the cable and not the connector, so special attention is required in selecting the cable too.

The chart below was built based on the maximum derated current until a temperature rise of 180°C was reached. It is intended as a guide only, when used with the stated cable sizes on the plug and socket. It's the designer's responsibility to consider all physical and environmental factors which may affect de-rating. Please feel free to contact your LEMO representative to assist in selecting appropriate connector solutions.

## Recommended cables

Brand	Reference	Wire section		Max temp.	Colour	Outer ø (mm)	Shielded	Operating voltage
		mm <sup>2</sup>	AWG

COROPLAST	9-2611/50	50	1	180°C	RAL 2003	15.8	Yes	600 VAC / 1000 VDC

## Contacts

Spare parts contacts can be ordered separately using references listed in this chapter.  
All connectors are delivered with their contacts except for coaxial, high voltage, fibre optic contacts.

Reference	Contact type
C	Male crimp with standard crimp barrel (fig. 1)
B	Male crimp with reduced crimp barrel (fig. 2)
D	Male straight print
H	Male / Female straight print (for HY model only)

Reference	Contact type
M	Female crimp with standard crimp barrel (fig. 1)
P	Female crimp with reduced crimp barrel (fig. 2)
N	Female straight print

### Crimp contacts for plugs, free or fixed sockets

Fig. 1

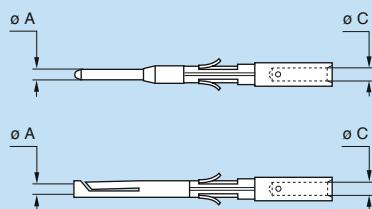

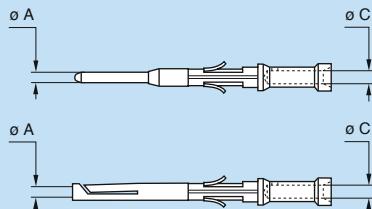

Fig. 2

Note: in order to satisfy crimp pull-test requirements to the IEC 60352-2 standard, the use of single strand cables should be avoided.

## FGN M series constant force spring clips

A range of constant force spring clips are available for use with M Series connectors, which permits repair of cable terminations without having to discard any of the existing braid shield system. When used in conjunction with LEMO heatshrink boots, a fully sealed termination is achieved. An additional benefit of the constant force spring is that it provides excellent resistance to shock or vibration due to its self-tensioning properties.

Part number	Series	Number of wraps	Width (mm)
FGN.0M.185.AZ	0M / 1M / 2M	4.3 / 3.5 / 2.6	4.0
FGN.3M.185.AZ	3M / TM	2.5 / 2.3	4.0

## Tie-wrap

	Part number
TIE-DEX®	AXON®
Tie wrap	A31089 AXCL 02

**Note:** tie wrap are used to ensure the best possible ground contact and fixture between the cable screen and the connector backshell. The tie wrap are delivered by set of 100 pieces.

## Accessories for Fibre Optique

### GMA Bend relief (for M series fibre optic model only)

A bend relief can be fitted over LEMO plugs and sockets supplied with a specific collet nut.

These bend reliefs are available in different colours and two different materials. TPU (Thermoplastic Polyurethane) is the standard choice for most applications. Silicone elastomer VMQ option can be selected where the applications required a wide temperature range (silicone material keeps a good flexibility over the full temperature range).

#### Main characteristics

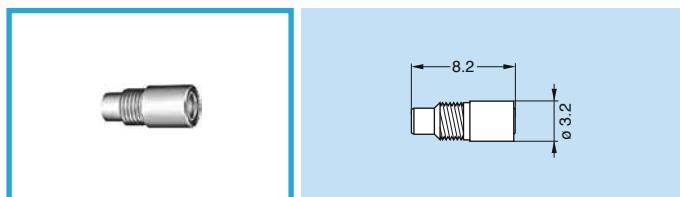

- Material: TPU (Thermoplastic Polyurethane)
- Temperature range in dry atmosphere: -40°C +80°C
- Material: Silicone elastomer VMQ
- Temperature range in dry atmosphere: -60°C +200°C
- Temperature range in water steam: +140°C

Part number (Polyurethane)	Series	Part number (Silicone)
GMA.2B.0..DG	2M	GMA.2B.0..RG
GMA.3B.0..DG	3M	GMA.3B.0..RG
GMA.4B.0..DG	5M	GMA.4B.0..RG

**Note:** please see unipole/multipole catalogue for bend relief dimensions. The last letter «G» of the part number indicates the grey colour of the bend relief. For ordering a bend relief with another colour, see table on the right and replace the letter «G» by the letter of the required colour.

Ref.	Colour	Ref.	Colour	Ref.	Colour
A	blue	J	yellow	R	red
B	white	M	brown	S	orange
G	grey	N	black	V	green

### PSS.F7.290.NZZ Alignment device for F7 Fibre Optic contact

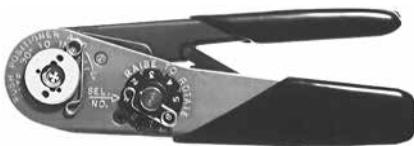

Alignment device are supplied as default with all female fibre optic contacts, this item is a spare accessory for maintenance purposes.

**Note:** alignment device should be ordered as replacement item.

# Tooling

## DPC Manual crimping tool

Part number

**DPC.91.701.V**

According to specification MIL-C-22520/7-01.  
For LEMO contacts ø 0.5-0.7-0.9-1.3 mm

## DCE Positioners for crimp contacts

Male

Female

Contact		Positioners part number	
Contact ø	Size	For male contacts	For female contacts

# Assembly instructions

## For cable mounted models

① heatshrink boot option to be ordered separately

### Cable preparation

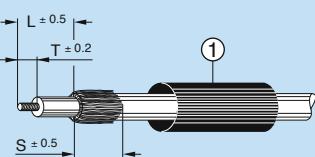

- Remove cable jacket and press the shield onto the cable (shield can be temporarily fixed using adhesive tape).
- Strip the cable elements using the dimensions specified in the table below. Dimensions must be selected according to the backshell variant in use.

#### Multipole

Series	Cable stripping length <sup>1)2)</sup> (mm)					
	P●● / FG● / FM●			FA● / FX● / FW●		
	L	S	T <sup>3)</sup>	L	S	T <sup>3)</sup>
<b>MM</b>	16	18	3.0	21	18	3.0
<b>0M</b>	16	18	3.5	21	18	3.5
<b>1M</b>	16	18	3.5	21	18	3.5
<b>2M</b>	18	20	3.5	23	20	3.5
<b>3M</b>	18	20	3.5	23	20	3.5
<b>TM</b>	20	23	3.5	26	23	3.5
<b>4M</b>	20	23	3.5	26	23	3.5
<b>LM</b>	20	23	3.5	26	23	3.5
<b>5M</b>	20	23	3.5	26	23	3.5

#### Note:

- indicative values, may need to be adapted according to your cable construction and specific pin allocation.
- for mixed, high speed, USB 2.0, fibre optic models please contact technical support for specific stripping length.
- for 1.3 mm contact «T» = 4 mm (1M.302/1M.303/2M.304).

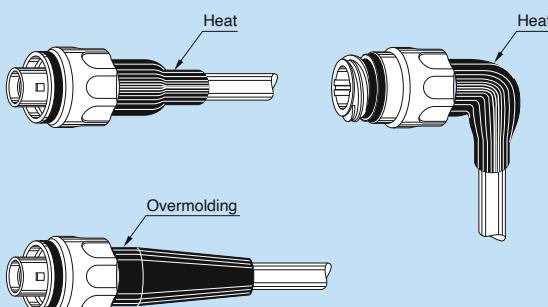

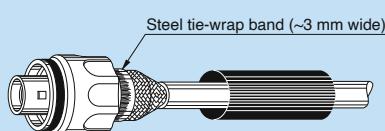

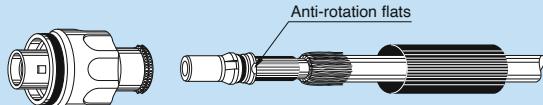

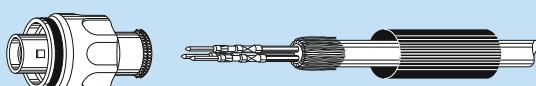

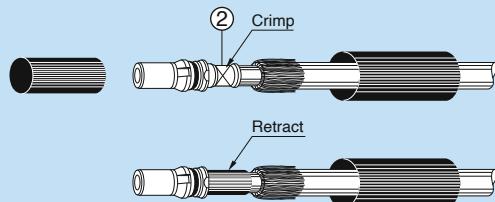

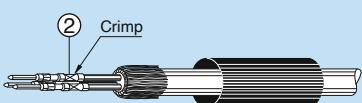

① heatshrink boot to be placed on cable if desired

#### High Power

Reference	Cable stripping length <sup>1)</sup> (mm)					
	P●● / FG● / FM●			FA● / FX● / FW●		
	L	S	T	L	S	T
<b>3M.H14</b>	24.0	33	10	24.0	27	10
<b>TM.H15</b>	24.0	33	10	24.0	27	10
<b>4M.H16</b>	24.0	33	12	24.0	27	12
<b>LM.H18</b>	27.0	39	13	27.0	33	13
<b>5M.H18</b>	27.0	39	13	27.0	33	13
<b>5M.H34</b>	24.0	30	10	24.0	25	10
<b>5M.G33</b>	24.0	30	10	24.0	25	10
	27.5 <sup>2)</sup>	30	3.5	27.5 <sup>2)</sup>	25	3.5 <sup>2)</sup>

#### Note:

- indicative values, may need to be adapted according to your cable construction and specific pin allocation.
- low power contact.

## Contact crimping

### Multipole versions

- Fix the appropriate positioner onto the crimping tool (see page 38).
- Set the tool selector on the corresponding AWG. Crimping tool setting can be found on the positioner label.
- Insert the conductor into the contact barrel ②; make sure that the conductor is visible through the contact's inspection hole.
- Slide the conductor-contact assembly into the crimping tool and push the contact fully into the positioner.
- Proceed with crimping and check that conductor is securely crimped in the contact. Also check that the conductor is still visible in the contact inspection hole.

### High Power versions

- Select the appropriate crimping tool (see page 40).
- Insert the conductor into the contact barrel ②.
- Slide the conductor-contact assembly into the crimping tool.
- Proceed with crimping and check that conductor is securely crimped in the contact. Also check that all conductor strands are securely fixed into the contact barrel.
- Place the supplied heatshrink tube to cover the crimped zone and cable inner jacket.
- Retract the heatshrink tube in the desired position using a heat gun.

## Contact insertion

### Multipole versions

- Arrange the conductor-contact assemblies according to the desired pin layout.
- Push the contact firmly into the insulator until mechanical click can be felt. The use of tweezers can facilitate contact insertion.
- Check that all contacts are correctly located in the insulator by verifying:
  - 1) the alignment of the contacts at the front of the insulator.
  - 2) by gently pulling on each conductor to verify that they are properly secured into the insulator.
- In case a crimp contact must be disassembled from insulator extraction tool can be found on page 38.

### High Power versions

- Arrange the conductor-contact assemblies according to the desired pin layout (multipole only).
- Insert the contact into the insulator, aligning the anti-rotation flats of the contact with the corresponding anti-rotation lugs inside the insulator.
- Push the contact firmly into the insulator until mechanical click can be felt.
- Check that the contact is correctly secured by gently pulling on the conductor.

## Braid connection

- Bring the braid around the backshell of the connector.
- Position the braid fixing accessory (tie-wrap or constant force spring clips, to be ordered separately).
- Proceed to braid fixing accessory installation using the dedicated tool.
- Recess the excess braid over the braid fixing accessory and trim the excess length.

## Bend relief installation

### Heatshrink boot versions

- Position the heatshrink boot (to be ordered separately) over the backshell by taking special care of keeping the braid in position under the boot.
- Gently retract the heatshrink boot using a heat gun.

### Overmolding versions

- For overmolding versions previous steps like contact insertion might need special preparation according to overmolding process in use. Contact us for details on specific overmolding preparation.

**Note:** the elbow version is not recommended for High Power versions.

---

**Note:**

## Product safety notice

**PLEASE READ AND FOLLOW ALL INSTRUCTIONS CAREFULLY AND CONSULT ALL RELEVANT NATIONAL AND INTERNATIONAL SAFETY REGULATIONS FOR YOUR APPLICATION.  
IMPROPER HANDLING, CABLE ASSEMBLY, OR WRONG USE OF CONNECTORS CAN RESULT IN HAZARDOUS SITUATIONS.**

### 1. SHOCK AND FIRE HAZARD

Incorrect wiring, the use of damaged components, presence of foreign objects (such as metal debris), and / or residue (such as cleaning fluids), can result in short circuits, overheating, and / or risk of electric shock.  
Mated components should never be disconnected while live as this may result in an exposed electric arc and local overheating, resulting in possible damage to components.

### 2. HANDLING

Connectors and their components should be visually inspected for damage prior to installation and assembly. Suspect components should be rejected or returned to the factory for verification.  
Connector assembly and installation should only be carried out by properly trained personnel. Proper tools must be used during installation and / or assembly in order to obtain safe and reliable performance.

### 3. USE

Connectors with exposed contacts should never be live (or on the current supply side of a circuit). Under general conditions voltages above 30 VAC and 42 VDC are considered hazardous and proper measures should be taken to eliminate all risk of transmission of such voltages to any exposed metal part of the connector.

### 4. TEST AND OPERATING VOLTAGES

The maximum admissible operating voltage depends upon the national or international standards in force for the application in question. Air and creepage distances impact the operating voltage; reference values are indicated in the catalog however these may be influenced by PC board design and / or wiring harnesses.  
The test voltage indicated in the catalog is 75% of the mean breakdown voltage; the test is applied at 500 V/s and the test duration is 1 minute.

### 5. CE MARKING

CE marking  means that the appliance or equipment bearing it complies with the protection requirements of one or several European safety directives.  
CE marking  applies to complete products or equipment, **but not to electromechanical components, such as connectors.**

### 6. PRODUCT IMPROVEMENTS

The LEMO Group reserves the right to modify and improve to our products or specifications without providing prior notification.

### 7. WARNING (Prop 65 State of California)

Proposition 65 requires businesses to provide warnings to Californians about significant exposures to chemicals that cause cancer, birth defects or other reproductive harm. LEMO products are exempt from proposition 65 warnings because they are manufactured, marketed, and sold solely for commercial and industrial use. For further information, please visit <https://www.lemo.com/quality/LEMO-Prop-65-compliance-declaration.pdf>.

## Disclaimers

LEMO works constantly to improve the quality of its products; the information and illustrations figuring in this document may therefore vary and are not binding. In any case, LEMO makes no specific warranty of merchantability, fitness for a particular purpose, third party components as such or included in assembly, non-infringement, title, accuracy, completeness, or security. The user is fully responsible for his products and applications using LEMO component.

In no event shall LEMO, its affiliates, officers, agents or employees be liable for any incidental, indirect, special or consequential damages in connection with the products or services provided by LEMO, including (without limitation) loss of profits or revenues, interruption of business, loss of use of the products or any associated equipment, materials, components or products, damages to associated equipment or in combination with other components, materials.
