

THERMISTORS

NTC Radial Lead Types

Description

NTE compensation type NTC thermistors are small-sized radial lead ethoxyline resin-enveloped thermistors designed for high precision and fast response.

Product Applications

- Home Appliances such as Air Conditioners, Refrigerators, Fans, Cookers, Washing Machines, Microwave Ovens, Radios, TVs, etc.
- Automotive Electronics
- Computers, Digital Meters

Specifications

Max. Power Rating (at 25°C): 450mW

Zero Power Resistance (at 25°): ±10%

Dissipation Factor: ≥15mW/°C

Thermal Time Constant: ≤15 sec

Insulation Resistance: ≥100MΩ

Operating Temperature Range: -40° to +125°C

T-01

NTE Type No.	Resistance (R ₂₅)	B Constant (B _{25/50})	Diag No.
02-N101-1	100Ω ±10%	3100K ±1%	T-01
02-N201-1	200Ω ±10%	3100K ±1%	T-01
