

## VOIDLESS HERMETICALLY SEALED STANDARD RECOVERY GLASS RECTIFIERS

Qualified to MIL-PRF-19500/420

Qualified Levels:  
JAN, JANTX, JANTXV  
and JANS

### DESCRIPTION

This “standard recovery” rectifier diode series is military qualified and is ideal for high-reliability applications where a failure cannot be tolerated. These industry-recognized 5.0 amp rated rectifiers for working peak reverse voltages from 200 to 1000 volts are hermetically sealed with voidless-glass construction using an internal “Category 1” metallurgical bond. These devices are also available in surface mount MELF package configurations. Microsemi also offers numerous other rectifier products to meet higher and lower current ratings with various recovery time speed requirements including fast and ultrafast device types in both through-hole and surface mount packages.

**MAXIMUM RATINGS**

- Notes:**
1. At .375 inch (9.52 mm) lead length from body.
  2. Derate linearly at 22.2 mA/°C from +55 °C to +100 °C.
  3. These  $I_O$  ratings are for a thermally (PC boards or other) mounting methods where the lead or end-cap temperatures cannot be maintained and where thermal resistance from mounting point to ambient is still sufficiently controlled where  $T_{J(MAX)}$  does not exceed 175 °C. This equates to  $R_{\theta,JX} \leq 47$  °C/W.
  4. Derate linearly at 26.7 mA/°C above  $T_A = +100$  °C to +175 °C ambient.
