

## **Data sheet for SINAMICS G120X**

Article No.: 6SL3220-1YE40-0AF0

Client order no. : Order no. : Offer no. : Remarks :

110% base load current IL for 60 s in a 300 s cycle time

High Overload (HO)

Communication

150% x base load current IH for 60 s within a 600 s cycle time

| General tech. specifications      |  |  |
|-----------------------------------|--|--|
| Power factor $\lambda$            | 0.90 0.95                              |  |
| Offset factor $\cos\phi$          | 0.99                                   |  |
| Efficiency η                      | 0.97                                   |  |
| Sound pressure level (1m)         | 70 dB                                  |  |
| Power loss 3)                     | 1.730 kW                               |  |
| Filter class (integrated)         | RFI suppression filter for Category C2 |  |
| EMC category (with accessories)   | Category C2                            |  |
| Safety function "Safe Torque Off" | without                                |  |
|                                   |  |  |

The percentage values show the losses in relation to the rated apparent power of the converter.

The diagram shows the losses for the points (as per standard IEC61800-9-2) of the relative torque generating current (I) over the relative motor stator frequency (f). The values are valid for the basic version of the converter without options/components.

\*converted values

 $<sup>^{1)}</sup>$  The output current and HP ratings are valid for the voltage range 440V-480V

<sup>&</sup>lt;sup>3)</sup>Typical value. More information can be found in the element group "Converter losses to IEC 61800-9-2" in this datasheet.
