## ■ Dimensions

## ○ Panel cut-out

(unit: mm)

※Screw tightening torque for mounting: 1.8 to 2.5N·m

## ○ Spacing

※When installing multiple SSRs, please keep space between SSRs for heat radiation.  
When installing SSRs horizontally (input part and output part on the same height), please supply less than 50% of the rated load current.

## ■ Connections

※Use terminals of size specified below.

Terminal type	Input	Output
 <Round>	a	Min. 3.5mm

## Proper Usage

### ⚠ Cautions during use

- Follow instructions in 'Cautions during Use'. Otherwise, it may cause unexpected accidents.
- 4-30VDC signal input should be insulated and limited voltage/current or Class 2, SELV power supply device.
- Attach a heat sink or install the unit in the well ventilated place.  
To attach the heat sink, use Thermal Grease as below or that of equal specification.  
※ Thermal Grease: GE TOSHIBA (YG6111), KANTO-KASEI (FLOIL G-600), SHINETSU (G746)
- Ground to the heat sink, panel, or DIN rail. Failure to follow this instruction may result in electric shock.
- While supplying power to the load or right after turning off the power of the load, do not touch the body and heat sink. Failure to follow this instruction may result in a burn due to the high temperature.
- In order to protect the product from the short-circuit current of the load, use rapid fuse of which  $I^2t$  is under the 1/2 of SSR  $I^2t$ . When short-circuited, replace the fuse to those of same specification with the used rapid fuse.
- Install dummy resistance in parallel with the load, to keep the sum of current flowing in the load and dummy resistance being over SSR minimum load current.
- When using random turn-on model for phase control, install noise filter between the load and the power of the load.
- Do not use near the equipment which generates strong magnetic force or high frequency noise.
- This unit may be used in the following environments.
 

① Indoors (in the environment condition rated in 'Specifications')	② Altitude max. 2,000m
③ Pollution degree 2	④ Installation category III
