

20 dB Fixed Attenuator, SMA Male to SMA Female Passivated Stainless Steel Body Rated to 2 Watts Up to 26 GHz

RF Fixed Attenuators Technical Data Sheet

PE7087-20

Features

- Bidirectional
- DC to 26 GHz Frequency Range
- Attenuation 20±0.75 dB

Applications

 Instrumentation//Precision measurements//Prototyping and Max Power 2 Watts (CW)

VSWR < 1.35:1

characterization//Production systems

Description

Pasternack carries a wide range of fixed attenuators with a broad selection of attenuation levels, frequency ranges, and power dissipation ranges. RF microwave attenuators (also known as RF pads) lower the amplitude of a signal (attenuate) a known amount and can be used in a wide variety of applications. These attenuator pads are used when a signal needs to be reduced to protect measurement equipment or other circuitry, to extend the range of power meters and amplifiers, and to impedance match circuits by reducing the VSWR seen by adjacent components. RF attenuators can prevent signal overload in amplifiers, receivers and detectors, adjusting the signal level to a range that is optimal.

Few RF components are as commonly used as fixed coaxial attenuators, and Pasternack carries one of the largest in-stock varieties and ships them same day. The 20 dB Fixed Attenuator PE7087-20 is rated to 2 Watts and operates from DC to 26 GHz. The versatile coaxial package uses SMA male to SMA female connectors and is also REACH compliant.

Electrical Specifications

Description	Minimum	Typical	Maximum	Units
Frequency Range	DC		26	GHz
Impedance		50		Ohms
Nominal Attenuation		20		dB
Attenuation Accuracy		0.75		dB
VSWR			1.4:1	
Input Power, CW			2	Watts
derated linearly from 2W @ 25	5°C to .5W @ 125°C			
Input Power, Peak			500	Watts
5µs pulse, .1% duty cycle
