

FEATURES:

- Low Profile SMD
- 1000VDC & 6000VDC Isolation
- Industry Standard Pinout
- Unregulated Single & Dual Outputs
- MTBF>1,000,000 hours
- Operating temperature: -40°C to +85°C
- High Efficiency up to 85%

Models
Single output

Model	Input Voltage (V)	Output Voltage (V)	Output Current max(mA)	Isolation (VDC)	Efficiency (%)
AM2L-0505SH60-NZ	4.5-5.5	5	400	6000	77
AM2L-1205SH60-NZ ✘	10.8-13.2	5	400	6000	78
AM2L-1215SH60-NZ ✘	10.8-13.2	15	133	6000	81
AM2L-2405SH60-NZ ✘	21.6-26.4	5	400	6000	79

NOTE: All specifications in this datasheet are measured at an ambient temperature of 25°C, humidity<75%, nominal input voltage and at rated output load unless otherwise specified.

The model AM2L-0505SH60-NZ is not recommended for new designs.

For models marked with ✘ will be discontinued (EOL) by December 30, 2020. For new design, please refer to AM2D-Z series.

Input Specifications

Parameters	Nominal	Typical	Maximum	Units
Voltage range	5	4.5-5.5		VDC
	12	10.8-13.2		
	24	21.6-26.4		

Isolation Specifications

Parameters	Conditions	Typical	Rated	Units
Tested I/O voltage	60 sec		1000, 6000	VDC
Capacitance	500VDC	10		pF
Resistance	500Vdc	>1000		MOhm

Output Specifications

Parameters	Conditions	Typical	Maximum	Units
Voltage accuracy	See Tolerance Graph	±5		%
Short Circuit protection	6000VDC Continuous		1	Sec
Short Circuit Restart		Auto-Recovery		
Line voltage regulation	For a 1% change of Vin	±1.2		%
Load voltage regulation (5 Vout)	From 10% load to 100% load	12.8		%
Load voltage regulation (12 Vout)		6.8		
Load voltage regulation (15 Vout)		6.3		
Temperature coefficient	At 100% load	±0.03		%/°C
Ripple & Noise*	20MHz Bandwidth	150		mV p-p
Minimum Load Current**		10		% of Max

*Test ripple & noise by "Parallel Cable Method" as described in Application Note "Ripple and Noise Measurement of Brick & POL DC-DC Converters" available on Aimtec's website www.aimtec.com

**If the operating output current is less than 10% of maximum it is recommended to install a load resistor in parallel with the load to ensure the actual load current meets the minimum load current requirement.

General Specifications

Parameters	Conditions	Typical	Maximum	Units
Switching frequency	100% load, nominal input	100		KHz
Operating temperature		-40 to + 85		°C
Storage temperature		-55 to + 125		°C
Maximum case temperature			100	°C

Cooling	Free Air Convection		
Humidity		95	% RH
Case material	Plastic(UL94-V0)		
Weight	6000VDC	3.8	g
Dimensions (L x W x H)	Single 6000VDC	0.94 x 0.79 x 0.32 inches	23.86 x 18.50 x 8.00mm
MTBF	>1,000, 000 hours (MIL-HDBK -217F, Ground Benign, t=+25°C)		
Maximum Soldering Temperature	1.5mm from case for 10 seconds	260	°C

Safety Specifications

Parameters	
Agency approvals	CE
Standards	EN 60601-1-1; EN 60601-1-2

Pin Out Specifications

Pin	Single
1	- V in
2	No Pin
3	No Pin
4	No Pin
5	No Pin
6	No Pin
7	NC
8	NC
9	+V out
10	-V out
11	No Pin
12	No Pin
13	No Pin
14	No Pin
15	No Pin
16	+V in

Typical Voltage Accuracy Characteristics

NOTE: On dual output models Pin 5 and Pin 10 are connected internally together.
Either Pin 5 or Pin 10, or both can be used as the -Vout
NC: not connected

Dimensions

Recommended Filter Circuit

If it is required to decrease the input/output ripple an “LC” filter network can be installed on the input and output of the converter (see above).

It should be noted that the inductance and the resonant frequency of the “LC” filtering network should differ from the DC/DC converter switching frequency to avoid mutual interference.

The capacitance of the outputfilter capacitor must not exceed the values in the Table below to avoid startup problems and ensure safe and reliable operation.

It’s not recommended to connect any external capacitor in the application field when output loading is less than 0.5 watt.

External Capacitor Tables

Input Capacitor (Cin)

Vin (VDC)	Cin (uF)
5	4.7
12	2.2
24	1

Output Capacitor (Cout)

Single Vout (VDC)	Cout (uF)
5	10
15	1

Overload Protection

The output circuit of these products has no protection against overload. It is recommended to install external overload protection in the form of a self-recovery fuse or a circuit breaker in series at the converter’s input.

To achieve a high degree of output voltage regulation, over-voltage, and over-current protection it is suggested to use the AM2LV-NZ series as an alternative.

NOTE: 1. Datasheets are updated as needed and as such, specifications are subject to change without notice. Once printed or downloaded, datasheets are no longer controlled by Aimtec; refer to www.aimtec.com for the most current product specifications. 2. Product labels shown, including safety agency certifications on labels, may vary based on the date manufactured. 3. Mechanical drawings and specifications are for reference only. 4. All specifications are measured at an ambient temperature of 25°C, humidity<75%, nominal input voltage and at rated output load unless otherwise specified. 5. Aimtec may not have conducted destructive testing or chemical analysis on all internal components and chemicals at the time of publishing this document. CAS numbers and other limited information are considered proprietary and may not be available for release. 6. This product is not designed for use in critical life support systems, equipment used in hazardous environments, nuclear control systems or other such applications which necessitate specific safety and regulatory standards other the ones listed in this datasheet. 7. Warranty is in accordance with Aimtec’s standard Terms of Sale available at www.aimtec.com.
