GENERAL PURPOSE INFORMATION

- Power Dissipation

  Total power dissipation P can be calculated by the maximum junction temperature, ambient temperature and thermal resistance.

$$P = \frac{T_{jMAX.} - T_A}{R_{th}}$$

$T_{jMAX.}$: Maximum Junction Temperature
T_A : Ambient Temperature
R_{th} : Thermal Resistance (to see Fig. 10, 11)

Taping Specification

SC-76 (SSP)

There are two types (-T1, -T2) of taping depending on the direction of the device.

-T1, -T2

Devices are taped in the direction as shown in the figure above, 3000 devices are w
one reel, as shown below.

Figure of Reel

You can get information about the dimensions of the taping and the reel by downlo
the PDF files below.

Caution

The part number consists of a device name and a taping specification.
For example, if you want to buy a RD6.2S in -T1 taping, the part number is: **RD6.2**
