产品规格手册

特性

- 低功耗，完全兼容以下系列
MAX706P/R/S/T、MAX708R/S/T、
MAX705/6/7/8、MAX813L:
- 6种高精度的电压监测可选
- 手动复位输入
- 内置 1.25V 电压监控器
- 看门狗功能 (706P/R/S/T/J、705/6/8/13L)
- 200ms 复位延迟输出
- 3种复位信号可选
- 8引脚 SOP、MSOP 封装

应用

- 电脑和控制器
- 嵌入式系统
- 电池供电系统
- 智能仪器
- 无线通信系统
- PDA 和便携式设备

概述

SP706P/R/S/T/J、SP708R/S/T/J、SP705/6/8、和 SP813L 芯片主要用于监控电源电压和电池电压。当电源电压低于 2.63V (706P/R, 708R)、2.93V (SP706S, SP708S)、3.08V (SP706T, SP708T)、4.00V (SP706J, SP708J)、4.40V (SP706/SP708)、或 4.65V (SP705, SP813L) 时，将产生复位信号。

SP706P/R/S/T/J、SP705/706/8/13L 芯片具有一个 1.6秒延时复位的看门狗电路。将 WDI 引脚悬空可以禁用看门狗计时器。

SP708R/S/T/J、SP708 芯片具有高电平和低电平两种复位电平输出，但没有看门狗功能。

SP706P 芯片与 SP706R 芯片的功能基本一致，但 SP706P 芯片复位输出高电平。SP813L 芯片与 SP705 芯片的功能也基本一致，但 SP813L 复位输出为高电平。

内置 1.25V 比较器，可用于监测电池的低电压。所有的芯片都具有手动复位功能。

封装形式有 8 引脚 SOP 和紧凑型 MSOP。

引脚功能

表 1 SP706P/R/S/T/J, SP708R/S/T/J, SP705/6/8, 813L 的引脚功能描述

| 序号 | 符号 | 描述 |
|----|--------|-----------------------------|
| 1 | VCC | 电源 |
| 2 | GND | 地 |
| 3 | !MR | 手动复位输入 |
| 4 | PFI | 1.25V 内置比较器反向输入端 |
| 5 | !PFO | 1.25V 内置比较器输出端 |
| 6 | WDI | 看门狗输入端, 将该引脚悬空可屏蔽看门狗功能 |
| 7 | !WDO | 看门狗输出端 |
| 8 | RESET | 高电平复位信号输出, RESET 与!RESET 反相 |
| 9 | !RESET | 低电平复位信号输出 |
| 10 | NC | 无 |

注：■ 代表此型号具有功能表里所示功能

电气参数

除非特别说明，典型值为：TA = 25 °C。

SP706P/R、SP708R 型器件的电源电压为 3.0V 至 5.5V，SP706S/708S 型器件的电源电压为 3.3V 至 5.5V，SP706T/708T 型器件的电源电压为 3.5V 至 5.5V，SP706J/708J 型器件的电源电压为 4.4V 至 5.5V，SP706/708 型器件的电源电压为 4.8V 至 5.5V，SP705/813L 型器件的电源电压为 5.0V 至 5.5V。

| SP705CU-L/TR | 8- 引脚MSOP | 0°C 至+70°C | 4.40V |
| SP706 芯片复位输出为低电平，且具有看门狗功能。 | | | |
| SP706CN-L/TR | 8- 引脚SOP | 0°C 至+70°C | 4.40V |
| SP706EN-L/TR | | - 40°C 至+85°C | |
| SP706CU-L/TR | 8- 引脚MSOP | 0°C 至+70°C | |

产品订购信息- SP708、SP813L
表 13 SP708、SP813L 芯片的订购信息

| 产品型号 | 封装类型 | 温度范围 | 复位阈值 |
|-------------------------------------|-----------|---------------|-------|
| SP708 芯片复位输出为低或高电平，不具有看门狗功能。 | | | |
| SP708CN-L/TR | 8- 引脚SOP | 0°C 至+70°C | 4.40V |
| SP708EN-L/TR | | - 40°C 至+85°C | |
| SP708CU-L/TR | 8- 引脚MSOP | 0°C 至+70°C | |
| SP813L 芯片复位输出为高电平，且具有看门狗功能。 | | | |
| SP813LCN-L/TR | 8- 引脚SOP | 0°C 至+70°C | 4.65V |
| SP813LEN-L/TR | | - 40°C 至+85°C | |
| SP813LCU-L/TR | 8- 引脚MSOP | 0°C 至+70°C | |

Attention

■ Any and all MSKSEMI Semiconductor products described or contained herein do not have specifications that can handle applications that require extremely high levels of reliability, such as life-support systems, aircraft's control systems, or other applications whose failure can be reasonably expected to result in serious physical and/or material damage. Consult with your MSKSEMI Semiconductor representative nearest you before using any MSKSEMI Semiconductor products described or contained herein in such applications.

■ MSKSEMI Semiconductor assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all MSKSEMI Semiconductor products described or contained herein.

■ Specifications of any and all MSKSEMI Semiconductor products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.

■ MSKSEMI Semiconductor strives to supply high-quality high-reliability products. However, any and all semiconductor products fail with some probability. It is possible that these probabilistic failures could give rise to accidents or events that could endanger human lives, that could give rise to smoke or fire, or that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.

■ In the event that any or all MSKSEMI Semiconductor products (including technical data, services) described or contained herein are controlled under any of applicable local export control laws and regulations, such products must not be exported without obtaining the export license from the authorities concerned in accordance with the above law.

■ No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written permission of MSKSEMI Semiconductor.

■ Information (including circuit diagrams and circuit parameters) herein is for example only ; it is not guaranteed for volume production. MSKSEMI Semiconductor believes information herein is accurate and reliable, but no guarantees are made or implied regarding its use or any infringement of intellectual property rights or other rights of third parties.

■ Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. When designing equipment, refer to the "Delivery Specification" for the MSKSEMI Semiconductor product that you intend to use.
