

Phase Locked Frequency Controller

FEATURES

- Precision Phase Locked Frequency Control System
- Crystal Oscillator
- Programmable Reference Frequency Dividers
- Phase Detector with Absolute Frequency Steering
- Separate Divider Outputs and Phase Detector Input Pins
- Double Edge Option on the Frequency Feedback Sensing Amplifier
- Two High Current Op Amps
- 5V Reference Output

DESCRIPTION

The UC1635 family of integrated circuits was designed for use in precision speed control of DC motors. An extension to the UC1633 line of phase locked controllers, these devices provide access to both of the digital phase detector's inputs, and include a reference frequency divider output pin. With this added flexibility, this family of controllers can be used to obtain phase synchronization of multiple motors.

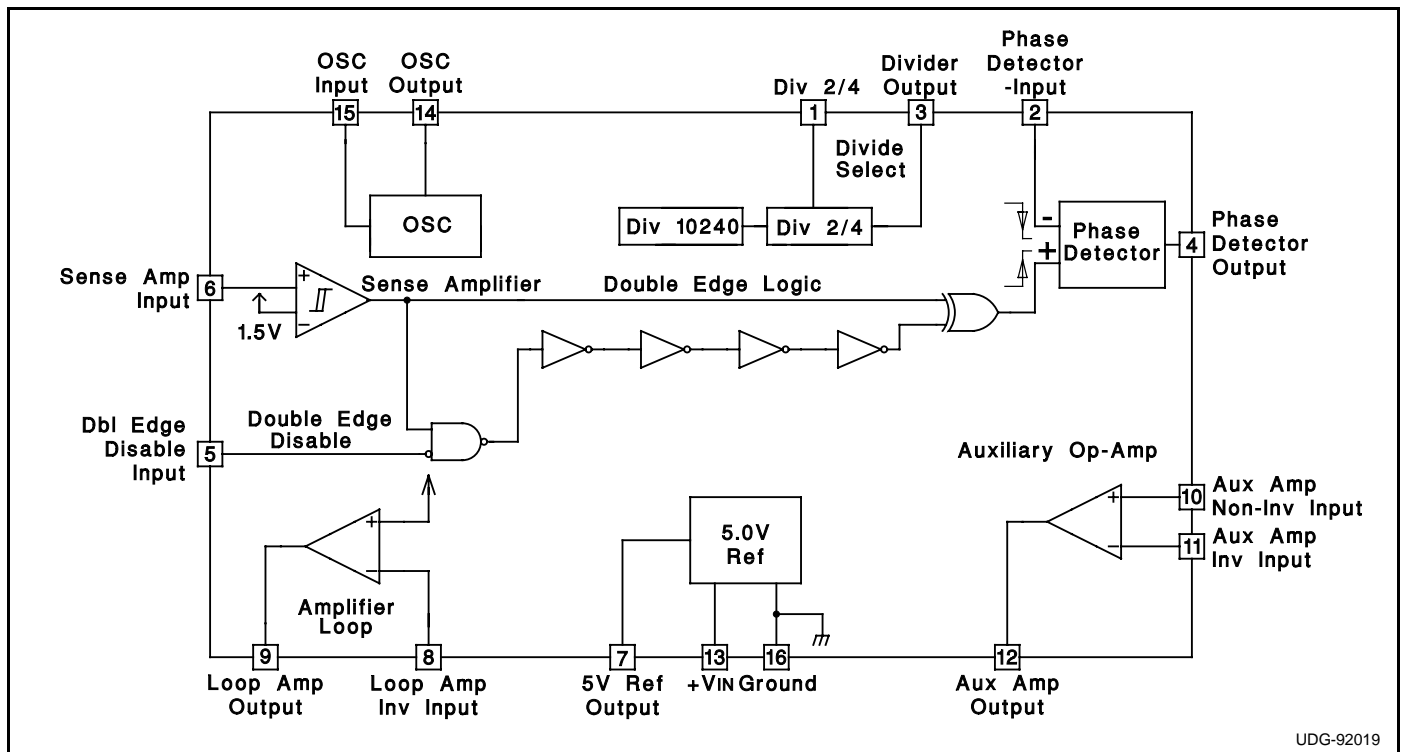

A reference frequency can be generated using the device's crystal oscillator and programmable dividers. The oscillator operates using a broad range of crystals, or, can function as a buffer stage to an external frequency source.

The phase detector responds proportionally to the phase error between the detector's minus input pin and the sense amplifier output. This phase detector includes absolute frequency steering to provide maximum drive signals when any frequency error exists. This feature allows optimum start-up and lock times to be realized.

Two op-amps are included that can be configured to provide necessary loop filtering. The outputs of these op-amps will source or sink in excess of 16mA, so they can provide a low impedance control signal to driving circuits.

Additional features include a double edge option on the sense amplifier that can be used to double the loop reference frequency for increased loop bandwidths. A 5V reference output can be used to accurately set DC operating levels.

BLOCK DIAGRAM

UDG-92019

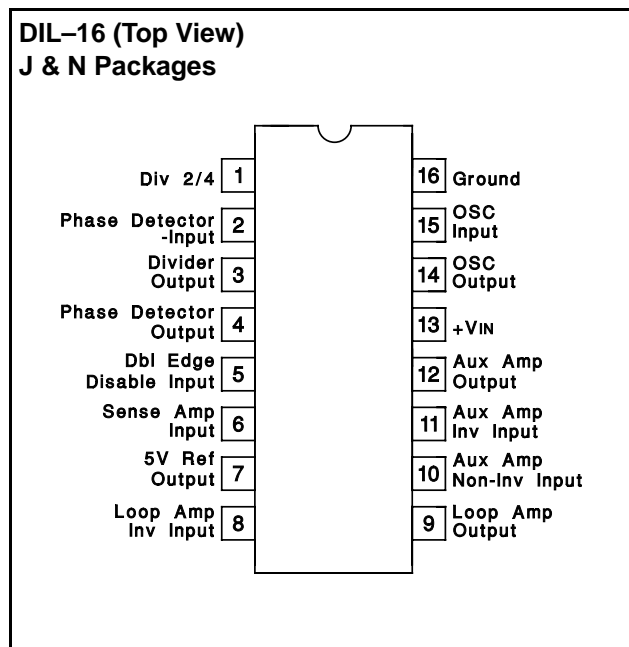

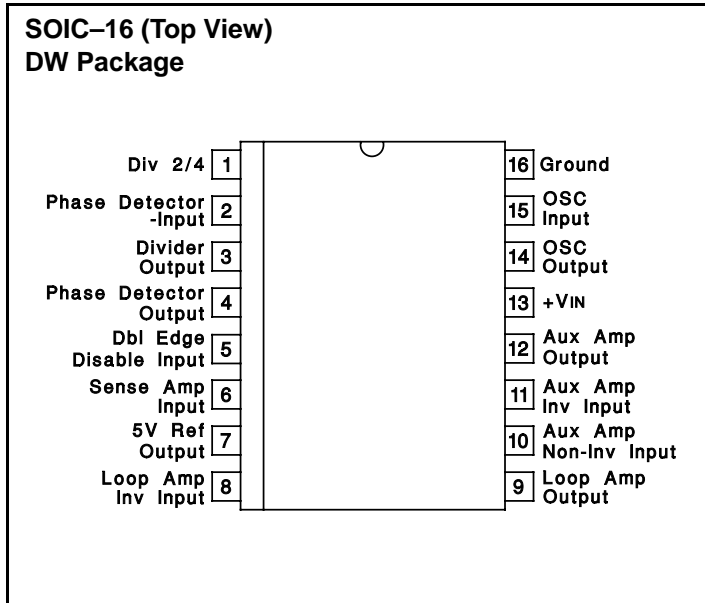

ABSOLUTE MAXIMUM RATINGS

Input Supply Voltage (+VIN) +20V
Reference Output Current -30mA
Op-Amp Output Currents ±30mA
Op-Amp Input Voltages -0.3 to +20V
Phase Detector Input Voltage -0.3V to +5V
Phase Detector Output Current ±10mA
Lock Indicator Output Current +15mA
Lock Indicator Output Voltage +20V
Divide Select Input Voltage -0.3V to +10V
Double Edge Disable Input Voltage -0.3V to +10V
Oscillator Input Voltage -0.3V to +5V
Sense Amplifier Input Voltage -0.3V to +20V
Power Dissipation at TA = 25°C, (Note 2) 1000mW
Power Dissipation at TC = 25°C, (Note 2) 2000mW
Operating Junction Temperature -55° to 150°C
Storage Temperature -65° to +150°C
Lead Temperature (Soldering, 10 Seconds) 300°C

Note 1: Voltages are referenced to ground, (Pin 16). Currents are positive into, negative out of, the specified terminals.

Note 2: Consult Unitrode Integrated Circuits databook for information regarding thermal specifications and limitations of packages.

CONNECTION DIAGRAMS

ELECTRICAL CHARACTERISTICS:

Unless otherwise stated, specifications hold for TA = 0°C to +70°C for the UC3635, -25°C to +85°C for the UC2635 and -55°C to +125°C for the UC1635, +VIN = 12V. TA = TJ.

PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNITS
Supply Current	+VIN = 15V		20	28	mA
Reference					
Output Voltage (VREF)		4.75	5.0	5.25	V
Load Regulation	IOUT = 0 to 7mA		5.0	20	mV
Line Regulation	+VIN = 8 to 15V		2.0	20	mV
Short Circuit Current	VOUT = 0V	15	35		mA

ELECTRICAL CHARACTERISTICS: Unless otherwise stated, specifications hold for $T_A = 0^\circ\text{C}$ to $+70^\circ\text{C}$ for the UC3635, -25°C to $+85^\circ\text{C}$ for the UC2635 and -55°C to $+125^\circ\text{C}$ for the UC1635, $+V_{IN} = 12\text{V}$. $T_A = T_J$.

PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNITS
Oscillator					
DC Voltage Gain	Oscillator Input to Oscillator Output	12	16	20	dB
Input DC Level (V_{IB})	Oscillator Input Pin Open, $T_J = 25^\circ\text{C}$	1.15	1.3	1.45	V
Input Impedance (Note 2)	$V_{IN} = V_{IB} \pm 0.5\text{V}$, $T_J = 25^\circ\text{C}$	1.3	1.6	1.9	k Ω
Output DC Level	Oscillator Input Pin Open, $T_J = 25^\circ\text{C}$	1.2	1.4	1.6	V
Maximum Operating Frequency		10			MHz
Dividers					
Maximum Input Frequency	Input = 1Vpp at Oscillator Input	10			MHz
Div 2/4 Input Current	Input = 5V (Div. by 2)		150	500	μA
	Input = 0V (Div. by 4)	-5.0	0.0	5.0	μA
Div 2/4 Threshold		0.5	1.6	2.2	V
Divider Output	High Level (w/6.8k Load to GND)	4.0	4.5		V
	Low Level (Open Collector Leakage)			10	μA
Sense Amplifier					
Threshold Voltage	Percent of V_{REF}	27	30	33	%
Threshold Hysteresis			10		mV
Input Bias Current	Input = 1.5V	-1.0	-0.2		μA
Double Edge Disable Input					
Input Current	Input = 5V (Disabled)		150	500	μA
	Input = 0V (Enabled)	-5.0	0.0	5.0	μA
Threshold Voltage		0.5	1.6	2.2	V
Phase Detector					
-Input Threshold	Detector Responds to Falling Edge	0.5	1.6	2.2	V
-Input Current	Input = 2.2V		100	250	μA
High Output Level	Positive Phase/Freq. Error, Volts Below V_{REF}		0.2	0.5	V
Low Output Level	Negative Phase/Freq. Error		0.2	0.5	V
Mid Output Level	Zero Phase/Freq. Error, Percent of V_{REF}	47	50	53	%
High Level Maximum Source Current	$V_{OUT} = 4.3\text{V}$	2.0	8.0		mA
Low Level Maximum Sink Current	$V_{OUT} = 0.7\text{V}$	2.0	5.0		mA
Mid Level Output Impedance (Note 3)	$I_{OUT} = -200$ to $+200\mu\text{A}$, $T_J = 25^\circ\text{C}$	4.5	6.0	7.5	k Ω
Loop Amplifier					
Non-Inv Reference Voltage	Percent of V_{REF}	47	50	53	%
Input Bias Current	Input = 2.5V	-0.8	-0.2		μA
AVOL		60	75		dB
PSRR	$+V_{IN} = 8$ to 15V	70	100		dB
Short Circuit Current	Source, $V_{OUT} = 0\text{V}$	16	35		mA
	Sink, $V_{OUT} = 5\text{V}$	16	30		mA

Note 3: These impedance levels will vary with T_J at about 1700ppm/ $^\circ\text{C}$.

ELECTRICAL CHARACTERISTICS (cont.): Unless otherwise stated, specifications hold for $T_A = 0^\circ\text{C}$ to $+70^\circ\text{C}$ for the UC3635, -25°C to $+85^\circ\text{C}$ for the UC2635 and -55°C to $+125^\circ\text{C}$ for the UC1635, $V_{in} = 12\text{V}$. $T_A = T_J$.

PARAMETER	TEST CONDITIONS	MIN	TYP	MAX	UNITS
Auxiliary Op-Amp					
Input Offset Voltage	$V_{CM} = 2.5\text{V}$			8	mV
Input Bias Current	$V_{CM} = 2.5\text{V}$	-0.8	-0.2		μA
Input Offset Current	$V_{CM} = 2.5\text{V}$.01	0.1	μA
AVOL		70	120		dB
PSRR	$+V_{IN} = 8$ to 15V	70	100		dB
CMRR	$V_{CM} = 0$ to 10V	70	100		dB
Short Circuit Current	Source, $V_{OUT} = 0\text{V}$	16	35		mA
	Sink, $V_{OUT} = 5\text{V}$	16	30		mA

⁽¹⁾ The marketing status values are defined as follows:

ACTIVE: Product device recommended for new designs.

LIFEBUY: TI has announced that the device will be discontinued, and a lifetime-buy period is in effect.

NRND: Not recommended for new designs. Device is in production to support existing customers, but TI does not recommend using this part in a new design.

PREVIEW: Device has been announced but is not in production. Samples may or may not be available.

OBSOLETE: TI has discontinued the production of the device.

⁽²⁾ Eco Plan - The planned eco-friendly classification: Pb-Free (RoHS), Pb-Free (RoHS Exempt), or Green (RoHS & no Sb/Br) - please check <http://www.ti.com/productcontent> for the latest availability information and additional product content details.

TBD: The Pb-Free/Green conversion plan has not been defined.

Pb-Free (RoHS): TI's terms "Lead-Free" or "Pb-Free" mean semiconductor products that are compatible with the current RoHS requirements for all 6 substances, including the requirement that lead not exceed 0.1% by weight in homogeneous materials. Where designed to be soldered at high temperatures, TI Pb-Free products are suitable for use in specified lead-free processes.

Pb-Free (RoHS Exempt): This component has a RoHS exemption for either 1) lead-based flip-chip solder bumps used between the die and package, or 2) lead-based die adhesive used between the die and leadframe. The component is otherwise considered Pb-Free (RoHS compatible) as defined above.

Green (RoHS & no Sb/Br): TI defines "Green" to mean Pb-Free (RoHS compatible), and free of Bromine (Br) and Antimony (Sb) based flame retardants (Br or Sb do not exceed 0.1% by weight in homogeneous material)

⁽³⁾ MSL, Peak Temp. -- The Moisture Sensitivity Level rating according to the JEDEC industry standard classifications, and peak solder temperature.

Important Information and Disclaimer:The information provided on this page represents TI's knowledge and belief as of the date that it is provided. TI bases its knowledge and belief on information provided by third parties, and makes no representation or warranty as to the accuracy of such information. Efforts are underway to better integrate information from third parties. TI has taken and continues to take reasonable steps to provide representative and accurate information but may not have conducted destructive testing or chemical analysis on incoming materials and chemicals. TI and TI suppliers consider certain information to be proprietary, and thus CAS numbers and other limited information may not be available for release.

In no event shall TI's liability arising out of such information exceed the total purchase price of the TI part(s) at issue in this document sold by TI to Customer on an annual basis.

IMPORTANT NOTICE

Texas Instruments Incorporated and its subsidiaries (TI) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or service without notice. Customers should obtain the latest relevant information before placing orders and should verify that such information is current and complete. All products are sold subject to TI's terms and conditions of sale supplied at the time of order acknowledgment.

TI warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with TI's standard warranty. Testing and other quality control techniques are used to the extent TI deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

TI assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using TI components. To minimize the risks associated with customer products and applications, customers should provide adequate design and operating safeguards.

TI does not warrant or represent that any license, either express or implied, is granted under any TI patent right, copyright, mask work right, or other TI intellectual property right relating to any combination, machine, or process in which TI products or services are used. Information published by TI regarding third-party products or services does not constitute a license from TI to use such products or services or a warranty or endorsement thereof. Use of such information may require a license from a third party under the patents or other intellectual property of the third party, or a license from TI under the patents or other intellectual property of TI.

Reproduction of TI information in TI data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alteration is an unfair and deceptive business practice. TI is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of TI products or services with statements different from or beyond the parameters stated by TI for that product or service voids all express and any implied warranties for the associated TI product or service and is an unfair and deceptive business practice. TI is not responsible or liable for any such statements.

TI products are not authorized for use in safety-critical applications (such as life support) where a failure of the TI product would reasonably be expected to cause severe personal injury or death, unless officers of the parties have executed an agreement specifically governing such use. Buyers represent that they have all necessary expertise in the safety and regulatory ramifications of their applications, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of TI products in such safety-critical applications, notwithstanding any applications-related information or support that may be provided by TI. Further, Buyers must fully indemnify TI and its representatives against any damages arising out of the use of TI products in such safety-critical applications.

TI products are neither designed nor intended for use in military/aerospace applications or environments unless the TI products are specifically designated by TI as military-grade or "enhanced plastic." Only products designated by TI as military-grade meet military specifications. Buyers acknowledge and agree that any such use of TI products which TI has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

TI products are neither designed nor intended for use in automotive applications or environments unless the specific TI products are designated by TI as compliant with ISO/TS 16949 requirements. Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, TI will not be responsible for any failure to meet such requirements.
